Risks Relating to Our Company and Its Business

(1) There are certain criminal and civil proceedings pending against us, our Promoters and directors, if decided against us, could have an adverse effect on our reputation, business prospects and results of operations.

There are criminal and civil litigation against us and our employees. These relate to defamation and obscenity charges against us under IPC. As of the date of this Draft Red Herring Prospectus, we have 46 criminal charges pending against us. In case any of the charges pending against us is decided against us, we and our employees may face penal consequences including a fine on the Company and/or imprisonment of our employees. This may affect our business, reputation and results of operations.

The following table sets out the summary details of pending litigation against us, our Promoters and directors of our Company as of the date of this Draft Red Herring Prospectus:

Category	Our Company	Our Subsidiaries	Promoters	Directors
Civil proceedings	52	1	14	Nil
Criminal proceedings	42	Nil	25	1
Tax proceedings	Nil	Nil	1	1

We also currently face several defamation civil actions and criminal charges and, from time to time, our newspapers, internet portals and FM radio stations may provide information and stories that may expose us, our directors and our employees to additional defamation civil actions and criminal charges, which could adversely affect our reputation and result in losses from damages awards against us. The sanctions for those found guilty of criminal charges are a fine and/or imprisonment. In addition, even if we are successful in defending such cases, we will be subject to legal and other costs relating to defending such litigation, and such costs could be substantial. This could adversely affect our business, results of operation and financial condition.

The following table sets out the summary details of pending litigation against us for defamation as of the date of this Draft Red Herring Prospectus:

Category	Our Company	Promoters	Directors
Civil proceedings	18	12	Nil
Criminal proceedings	42	25	1

For further details of outstanding litigation pending against us, please refer to the section titled “Outstanding Litigation and Material Developments” beginning on page 270.

(2) Our business is dependent on advertising revenue and a reduction in advertising expenditure, loss of advertising customers or our inability to attract new customers could have a material adverse affect on our business.

We rely substantially on advertisements for our revenue. During the financial year ended March 31, 2009 we derived 75.50% of our consolidated income from advertisement income. Accordingly, a reduction in advertising spending by our customers, the loss of advertising customers or an inability to attract new advertising customers could have a material adverse effect on our business, results of operations and financial condition.

Advertising expenditure by our customers and our ability to attract new customers are influenced by, among other factors, circulation and readership, geographical reach of our newspapers, readership demographics, competitor actions (such as them reducing advertising rates) and the preference of advertising customers for one form of media over another. In addition, advertising expenditure is influenced by a number of factors including the Indian economy, the performance of particular industry sectors, shifts in consumer spending patterns and changes in consumer sentiments and tastes.

In the Fiscal 2009, approximately 39.6% of our unconsolidated advertising revenues was derived from our national level customers. Our business and results of operations will be adversely affected if we lose any of our major customers. We have no long-term contracts guaranteeing us advertising revenue. The current global economic slowdown has resulted in a decline in advertising and marketing services among our customers, resulting in a decline in advertising revenue across our business. In an economic slowdown, spending with respect to marketing and advertisements are often the first costs to be reduced. Additionally, advertisers, and the agencies that represent them, have put increased pressure on advertising rates, in some cases, requesting broad percentage discounts on advertisements and re-negotiating booked orders. Reductions in advertising expenditures increases in the discounting of advertising rates have adversely affected our revenue and the continuation of the global economic slowdown would likely continue to adversely impact our revenue, profit margins, cash flow and liquidity in future periods. In addition, in the event that the current economic situation improves, we cannot predict whether or not advertisers' demands and budgets for advertising will return to previous levels.

We obtain advertisement orders directly from the underlying advertisers as well as through advertising agencies. Advertising agencies place advertisement orders for their clients with us either for a particular day or for a comprehensive advertising campaign. We have no long term contracts guaranteeing us advertising revenue. Some of these advertisers or advertising agencies may switch to our competitors or other media platforms, which may adversely affect our revenues and results of operations.

(3) The ownership of the newspaper “Dainik Bhaskar” has been challenged in the past.

In the past, the ownership of the newspaper “Dainik Bhaskar” has been challenged by certain relatives of one of our Promoters as well as by other persons. Although the ownership of “Dainik Bhaskar” was relegated back to the Company immediately prior to June 29, 1992 (pursuant to a letter of the Registrar of Newspapers for India (“RNI”) dated June 18, 2004 based on the order of the Hon’ble Supreme Court of India dated July 7, 2003, which was thereafter updated by the RNI) and the ownership has been registered in our name, we cannot assure you that such persons will not raise any similar or other disputes in future. In the event such disputes are raised and subsequently determined against our Company, the same could have an adverse impact on our reputation and goodwill. For further details, please refer to the section titled “History and Certain Corporate Matters” beginning on page 92.

(17) We cannot publish ‘Dainik Bhaskar’ from Satna and Nagpur.

Our Company has entered into memorandum of understanding dated June 12, 2008 with the late Mr. Bishambhar Dayal Agarwal through his legal heirs and Bhaskar Prakashan Private Limited. Pursuant to the memorandum of understanding the legal heirs of the late Bishambhar Dayal Agarwal have relinquished ownership of the title “Dainik Bhaskar” in favor of our Company. As consideration for the same, our Company has provided Bhaskar Prakashan Private Limited, the absolute right with complete discretion for selecting, organizing, collecting, procuring, printing, publishing, managing information, comments, news, advertisement and to use and enjoy the goodwill of the mark/title ‘Dainik Bhaskar’ in Nagpur and Satna. Pursuant to the memorandum of understanding we cannot publish ‘Dainik Bhaskar’ in Nagpur and Satna. For further details, please refer to the section titled ‘History and Certain Corporate Matters’.

(18) A decrease in the circulation and readership of our newspapers may adversely affect our business and results of operations.

Circulation and readership of our newspapers among our readers is an important source of our revenue as they significantly influence ad-spend by our advertisers and our advertising rates. Circulation and readership are dependent on, among other factors, the quality of our editorial content and the preferences of our readers, the reach of our newspapers, the loyalty of our readers to our newspapers and our ability to successfully establish new locally focused newspapers in new regions. Any failure by us to meet our readers’ preferences, quality standards or to establish ourselves in new markets could adversely affect our circulation or readership over time. In particular, circulation in the Indian newspaper market is also largely affected by price and, therefore, the circulation of our newspapers may be adversely effected if we fail to meet any price competition. A decline in the circulation or readership of one or more of our newspapers for any reason could adversely affect our business, results of operations and financial condition.

(19) Our business is dependent on the supply and cost of newsprint.

Newsprint forms the major raw material for our business, and represents a significant portion of our costs. Our newsprint requirements are sourced from Indian and international suppliers. The price and supply of newsprint both worldwide and in India has historically been both cyclical and volatile. Any significant increase in the price of newsprint and/or disruption in our supply of newsprint would adversely affect our business and results of operations. Contracts with our suppliers of newsprint are generally contracted through medium term contracts which generally have terms of approximately 3 to 6 months, in addition, we do not hedge the price of our newsprint purchases, therefore we are vulnerable to the volatility of the market for newsprint.

(20) Our strategy to expand into new markets may not succeed.

Our business plans include growing readership and circulation in new markets. In addition this strategy, requires us to successfully attract advertising based on our ability to grow readership. Success of this plan is subject to business, economic and competitive uncertainties and contingencies, many of which are beyond our control. As

a consequence, our strategy to expand into new markets may not be profitable and we may not be able to fully implement our strategy or realize our anticipated results.

(21) We rely on third parties for the sale and distribution of our publications and any disruption to the sale and distribution network may adversely affect our business and results of operations.

We rely on an extensive network of agents and vendors for the sale and distribution of our newspapers and other publications. As of June 30, 2009, we had 74 distribution centres, 3,293 agents, 3,685 sub-agents, 18,805 vendors and 13,027 sub-vendors within our distribution network. Our distribution network is multi-tiered. We generally supply newspapers to the circulation agents on the basis of fixed term contracts. They, in turn, distribute newspapers to a network of vendors. Further, our circulation agents and vendors are retained on a non-exclusive basis and also distribute newspapers for our competitors. If our competitors provide better commissions or incentives (or if we reduce our commissions or incentives) to our circulation agents and vendors, it could result in them favoring the products of our competitors over our products. Any significant disruption in the supply of our newspapers could lead to a decline in the circulation and readership, and therefore the demand for advertising, of our newspapers and adversely affect our business and results of operation.

(22) We face intense competition, and if we are not able to compete effectively, our business, results of operations and financial condition will be adversely affected.

The Indian newspaper industry is intensely competitive. In each of our markets, we face competition from other newspapers for circulation, readership and advertising. In addition, we face competition from other forms of media including, but not limited to, television broadcasters, magazines, radio broadcasters and websites. These other forms of media compete with newspapers for advertisers and also for the time and attention of readers. In addition, we face competition from international media companies as the Government of India has recently liberalized its foreign investment regulations and restrictions applicable to the media sector.

Competition for circulation and readership has often resulted in our competitors reducing the cover-prices of their newspapers. Furthermore, competition for advertising from newspapers has often resulted in our competitors reducing advertising rates or offering price incentives to advertising customers. In view of such price competition, we may from time to time need to (1) reduce the cover price of our newspapers, (2) reduce our advertising rates and/or (3) offer other price incentives. Any such reduction in prices or rates or the introduction of new price incentives could have a material adverse effect on our results of operations.

Some of our competitors may have greater financial resources, generate higher revenues, and therefore, may be able to better respond to market changes and shifts in consumer spending patterns and changes in consumer sentiments and tastes than we can. They also may be more established in certain markets in which we operate and in a better position than us to sustain losses in revenue due to pricing pressures on advertising rates and cover prices of newspapers. Furthermore, through SMEL, we operate our FM radio and, through IMCL, we run our digital businesses and face significant competition from companies that have more established FM radio and digital businesses. Accordingly, we cannot be certain that we will be able to compete effectively with our competitors or that we will not lose circulation, readership or listenership to our competitors or lose advertising business to them. If we are not able to compete effectively, our business, results of operations and financial condition could be adversely affected.

(23) We or our Subsidiaries have, and in the future may evaluate, new businesses in which we may have limited or no operating experience.

We, through our subsidiary, SMEL, operate an FM radio business and, through IMCL, we operate our digital businesses and face significant competition from companies that have more established FM radio and digital businesses. Our market is characterized by rapid change, evolving industry standards, changing client preferences and new service introductions. Our future success will depend on our ability to anticipate these advances and develop new service offerings to meet client needs. We may not be successful in anticipating or adequately responding to these advances in a timely basis due to lack of experience, or if we do respond, the services we develop may not be successful in the market place. Further, services that are developed by our competitors may render our offerings non-competitive, obsolete or force us to reduce prices, thereby adversely affecting our margins.

(24) We are dependent on the expertise of our senior management and key personnel and the results of our

operations may be adversely affected by the departure of our senior management and key personnel.

We are dependent on our senior management team for setting our strategic direction and managing our business, both of which are crucial to our success. In the event any or all of them leave or are unable to continue to work with us, it may be difficult to find suitable replacements in a timely manner or at all. Our ability to retain experienced personnel as well as senior management will also in part depend on us maintaining appropriate staff remuneration and incentive schemes. We cannot be sure that the remuneration and incentive schemes we have in place will be sufficient to retain the services of our senior management and skilled people. The loss of any of the members of our senior management or other key personnel may adversely affect our business, financial condition and results of operations and could cause the price of our Equity Shares to decline.

(25) Our business is subject to extensive regulation by the state and central governments, which could have an adverse effect on our business and results of operations.

The Indian media industry is subject to extensive regulation by state and central governments. We and our subsidiaries are required to obtain licenses, permits and approvals to operate our print media, internet portals and FM radio businesses. We cannot assure that we will be able to obtain and comply with all necessary licenses, permits and approvals for our businesses. In addition, certain of these licenses, permits and approvals could be subject to renewal and modification and there can be no assurance that such licenses, permits and approvals will be renewed on terms that as advantageous as existing terms and conditions, or at all.

Under applicable laws, in the event of default by us, certain adverse consequences such as imposition of penalties, revocation or termination of a license or suspension of a license, may occur. Our business might suffer in case there are adverse changes to the regulatory framework, which could include further new regulations that we are unable to comply with or those that allow our competitors an advantage. If we cannot comply with all applicable regulations, our business prospects and results of operations could be adversely affected.

(26) We face significant challenges in operating our FM radio business.

We operate FM radio stations, under brand name *MY FM*, through SMEL, our subsidiary company. SMEL currently operates 17 FM radio stations in various cities, pursuant to licenses granted by the GOI to broadcast FM radio entertainment programs (other than news and news-related programs). However, these licenses are subject to significant restrictions including, among others, the types of radio programs that each of our FM station can broadcast. For example, these licenses only allow our FM radio stations to broadcast certain entertainment programs, and restrict us from broadcasting any news, news-related and other restricted programs. Any violation of licensing or regulatory requirements by us could result in the revocation of our licensee or other penalties on us, thereby adversely affecting our reputation, business, results of operations and financial conditions.

Because of our limited experience in the FM radio business, we will also face significant competitive, operational, sales, marketing and management challenges in operating our FM radio business, particularly in new markets. In addition, our strategic growth plans may place significant demands on our management team as well as demands on our working capital and financial resources. If we are unable to meet these challenges and manage our growth, our business and financial performance could be adversely affected.

(27) We have entered into transactions with related parties, which create conflicts of interest for certain of our management and directors.

We have entered into transactions with related parties, including our Promoter and its affiliated companies, including Promoter Group companies. These include agreements such as (i) the publication license agreement in relation to DNA between our Company and DMCL and (ii) other agreements with directors. For further details, please refer to the section titled “Financial Statements — Related Party Transactions” beginning on page F1. There can be no assurance that our transactions with such related parties have been, or will be, entered into on an arm’s-length basis. Such agreements give rise to current or potential conflicts of interest with respect to dealings between us and such related parties. Additionally, there can be no assurance that any dispute that may arise between us and related parties will be resolved in our favor.

(28) Our substantial indebtedness and the conditions and restrictions imposed by our financing and other agreements could adversely affect our ability to conduct our business, financial condition and operations.

We currently have a substantial amount of consolidated secured indebtedness of Rs. 4,713.40 million as of June 30, 2009, and we may incur substantial additional indebtedness in the future. Our indebtedness could have several adverse consequences, including but not limited to the following:

- we may be required to dedicate a portion of our cash flow towards repayment of our existing debt, which will reduce the availability of our cash flow to fund working capital, capital expenditures, acquisitions and other general corporate requirements;
- our ability to obtain additional financing in the future may be impaired;
- fluctuations in market interest rates may adversely affect the cost of our borrowings;
- fluctuation in foreign currency exchange rates may adversely affect our interest costs;
- there could be a material adverse effect on our business, financial condition and results of operations if we are unable to service our indebtedness or otherwise comply with financial covenants of such indebtedness; and
- we may be more vulnerable to economic downturns, may be limited in our ability to withstand competitive pressures and may have reduced flexibility in responding to changing business, regulatory and economic conditions.

Our financing arrangements limit our ability to create liens or other encumbrances on our property, acquire other businesses, sell or otherwise dispose of assets, make certain payments and investments, and merge or consolidate with other entities in certain circumstances. Further, our lenders have certain rights to determine how we operate our business, to terminate the credit facilities, to seek early repayments of our loans and to charge penalties for prepayments or cancellations of our loan. Consent from these lenders is required for certain corporate and business actions, changes in shareholding and management decisions. Any failure to service our indebtedness, maintain the required security interests, comply with a requirement to obtain a consent or otherwise perform our obligations under our financing agreements could lead to a termination of one or more of our credit facilities, penalties and acceleration of amounts due under such facilities, which may adversely affect our business, financial condition and results of operations. For further details, please refer to the section titled “Financial Indebtedness” beginning on page 240.

(29) Some of our facility agreements have certain restrictive covenants, such as the right to convert the loan amount into equity in the event of default in payment or call for repayment of the entire loan amount prior to the repayment schedule.

One of our lenders, Industrial Development Bank of India Limited, pursuant to an agreement dated May 29, 2008, has a right to convert at their option, whole or part of their outstanding rupee term loan of Rs. 700 million into fully paid up equity shares upon an event of default in the payment of the loan amount within 30 days from the due date of the payment of loan. Further, one of our lenders, ICICI Bank Limited, pursuant to an agreement dated March 16, 2009, has a call option on their rupee term loan of Rs.1000 million , requiring 15 days prior written notice to our Company. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flow generated by our business over time, as well as capital markets as source of capital. If we fail to meet our debt service obligations or financial covenants required under the financing documents, the relevant lenders could declare us in default under the terms of our borrowings, accelerate the maturity of our obligations or convert the outstanding loan amount into equity shares. We cannot assure you that, in the event of any such acceleration, we will have sufficient resources to repay these borrowings. Failure to meet our obligations under the debt financing arrangements could have an adverse effect on our cash flows, business and results of operations. For details on our indebtedness our Company, refer to section titled “Financial Indebtedness” on page 240.

(30) Our business is highly capital intensive.

We may require additional debt and equity funding to fund future operational needs and debt service payments. We may also need to maintain substantial working capital especially to launch new newspapers or new editions

of our existing newspapers and to incur costs to establish brand loyalty and grow readership and circulation of our newspapers.

The amount of such additional required funding will depend on a number of factors, including whether our projects are completed within budget, any investments we may make and the amount of cash flow from our operations in the future. If cost overruns are significant, the additional funding we would require could be substantial. Additional debt funding may not be available as and when required and, if incurred, would result in increased debt service obligations and could result in additional operating and financing covenants, or liens on our assets, that would restrict our operations. The issue of additional equity securities could result in dilution to our shareholders.

Our ability to obtain required funding on acceptable terms is subject to a number of uncertainties, including:

- limitations on our ability to incur additional debt, including as a result of prospective lenders' evaluations of our creditworthiness and pursuant to restrictions on incurrence of debt in our existing and anticipated credit arrangements;
- investors' and lenders' perception of, and demand for, debt and equity securities of print media companies, as well as the offerings of competing financing and investment opportunities in India by our competitors;
- the rules and regulations relating to foreign investment in Indian companies;
- conditions in the Indian and international capital markets in which we may seek to raise funds;
- our future results of operations, financial condition and cash flows; and
- economic, political and other conditions in India and internationally.

Without required funding, we may not be able to:

- continue or expand our operations;
- hire, train and retain employees;
- market our products; or
- respond to competitive pressures or unanticipated funding requirements.

We cannot assure that necessary financing will be available in amounts or on terms acceptable to us, or at all. If we fail to raise additional funds in such amounts and at such times as we may need, we may be forced to reduce our capital expenditures, which may result in our inability to meet drawing conditions under our current loan facilities or default and exercise of remedies by the lenders under our loan facilities. In that event, our business and results of operations would be materially and adversely affected.

(31) Our planned capital expenditures may not yield the benefits intended.

Our operations constantly require capital expenditures to increase capacity. Our capital expenditure plans are generally based on management estimates and are not appraised by any bank, financial institution or other independent organization. Our capital expenditure plans are subject to a number of variables, including possible cost overruns, our financing needs, receipt of critical governmental approvals, availability of financing on acceptable terms and changes in management's review of the desirability of plans, among others. In addition, we may be unable to effectively manage our capital expansion and future growth due to the resulting strain on our managerial, operational and financial resources. In view of the reasons stated above, we cannot assure that we will be able to execute our capital expenditure plans as contemplated. There could be significant delays and cost overruns if we experience delays in the implementation of our capital expenditure plans. Due to these time and/or cost overruns the overall benefit of such plans to our revenues and profitability may decline. To the extent that completed and/or planned capital expenditure does not produce anticipated or desired revenue or cost-reduction outcomes, our profitability and financial condition will be negatively affected.

(32) Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.

Although we attempt to maintain the latest international technology standards, the technology requirements for businesses in the print media sector are subject to continuing change and development. Some of our existing technologies and processes in our operations may become obsolete, performing less efficiently compared to newer and better technologies and processes in the future. The cost of upgrading or implementing new technologies, upgrading our existing equipment or expanding capacity could be significant and could adversely affect our results of operations.

(33) The purposes for which the proceeds of the Issue are to be utilized are based on management estimates and have not been appraised by any banks or financial institutions.

Our funding requirements and the deployment of the net proceeds of the Issue are based on management estimates and have not been appraised by any banks or financial institutions. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change. This may result in the rescheduling of our expenditure programs and an increase or decrease in our proposed expenditure for a particular object. For further details, please refer to the section titled "Objects of the Issue" on page 30.

(34) We may be unable to attract and retain skilled professionals.

Our ability to implement our business strategy will depend, in large part, on our ability to attract, train, motivate and retain highly skilled personnel. Our inability to hire and retain additional qualified personnel will impair our ability to continue to expand our business. Our competitors may also expand their operations and may recruit skilled personnel by offering compensation and incentives that are more attractive than ours. An increase in the rate of attrition for our experienced employees would adversely affect our growth strategy. We cannot assure that we will be successful in recruiting and retaining a sufficient number of technical personnel with the requisite skills to replace those technical personnel who leave. Further, we cannot assure that we will be able to re-deploy and re-train our technical personnel to keep pace with continuing changes in our business. While we believe our relationship with our employees is generally good and we have not in the past experienced any strikes, work stoppages or other industrial action, we cannot guarantee that we will not experience any such actions in the future.

(35) Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.

We and third parties upon whom we depend are, and will be, subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labour, workplace and related laws and regulations. Some of our operations (including printing facilities) and the third parties upon whom we depend are, and will be, subject to risks associated with safety, health and environment, including risks of personal injury, loss of life, environmental damage and severe damage to property.

We are also subject to environmental laws and regulations, including the Environmental Protection Act, 1986, the Air (Prevention and Control of Pollution) Act, 1981, the Water (Prevention and Control of Pollution) Act, 1974 and other regulations promulgated by the Ministry of Environment & Forests and the Pollution Control Boards of the relevant states.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted. The costs and management time required to comply with these requirements could be significant. The measures we implement in order to comply with these new laws and regulations may not be deemed sufficient by governmental authorities and our compliance costs may significantly exceed our estimates. In addition, some of these laws and regulations may require our facilities to operate under permits that are subject to renewal or modification. If we fail to meet safety, health and environmental requirements, we may also be subject to administrative, civil and criminal proceedings by governmental authorities, as well as civil proceedings by environmental groups and other individuals, which could result in substantial fines and penalties against us as well as orders that could limit or halt our operations and could include us being required to incur substantial clean up costs. Penalties imposed by regulatory authorities on us or third parties upon whom we depend may also disrupt our business and operations.

There can be no assurance that we will not become involved in future litigation or other proceedings or be held responsible in any such future litigation or proceedings relating to safety, health and environmental matters in the future, the costs of which could be material. Clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

(36) Our businesses expose us to potential liabilities that may not be covered by insurance.

Our businesses are subject to a number of risks that could expose us to substantial liability for personal injury, wrongful death, product liability, property damage, pollution and other environmental damages. Although we have obtained insurance against many of these risks, our insurance may not be adequate to cover our liabilities. Further, there is no assurance that insurance will be generally available in the future or, if available, that premiums will be commercially justifiable. If we incur substantial liability and the damages are not covered by insurance or exceed policy limits, or if we are not able to obtain liability insurance, our business, results of operations and financial condition could be materially adversely affected. Our insurance is subject to customary deductibles, exclusions and limits which may prevent us recovering on losses.

(37) We may undertake acquisitions, investments, strategic relationships or divestments in the future, which may pose management and integration challenges.

We may make acquisitions, investments, strategic relationships and divestments in the future as part of our growth strategy. These acquisitions, investments, strategic relationships and divestments may not necessarily contribute to our profitability and may divert the attention of our management or require us to assume high levels of debt or contingent liabilities as part of such transactions. In addition, we may experience difficulty in combining operations and cultures and may not realize the anticipated synergies or efficiencies from such transactions. These difficulties could disrupt our ongoing business, distract our management and employees and increase our expenses.

(38) Our principal place of business, registered office and printing centres are located in leased premises in which we have limited rights

Our business headquarters are located at 6 Dwarka Sadan, Press Complex, MP Nagar, Bhopal, Madhya Pradesh, India and our registered office is located at 280 near YMCA Club, Makarba, Gandhi Nagar – Sarkhez Highway , Ahmedabad and we have limited rights to use the land and other immovable assets therein, which we do not own. Also, the ownership of a significant portion of the land and buildings we use are vested with WPL and we have limited rights in the immovable property in all of our printing centres. If a significant number of our leases were terminated or not renewed, or renewed on materially less favorable terms, our financial condition and results of operations may be materially adversely affected. For further details as to lease rental amounts, term and other restrictive covenants, please refer to the section titled “Our Business” beginning on page 57.

(39) Our business is dependent on our printing centres and the loss of or shutdown of operations at any of these centres could adversely affect our business.

We have 30 printing centres, all of which are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our printing facilities use heavy equipment and machinery and whilst the same are insured, the breakdown or failure of equipment or machinery may result in us having to make repairs or procure replacements that can require considerable time and expense. Accordingly, any significant operational problems, the loss of one or more of our printing facilities or a shutdown of one or more of our facilities for an extended period of time could adversely affect our business and results of operations. In addition, some of our printing centres are located on leased properties and the non-renewal of these leases may disrupt our printing processes. For further details, please see the section titled “Our Business” beginning on page 57.

(40) Certain of our Subsidiaries have incurred losses during the last 3 financial years which may adversely affect our results of operations.

Certain of our Subsidiaries (namely, IMCL and SMEL) have incurred losses in the last 3 fiscal years.

(Rs. in million)

Name of Subsidiaries	March 31, 2007	March 31, 2008	March 31, 2009
IMCL	(17.77)	(52.42)	(53.05)
SMEL	(31.31)	(281.78)	(273.25)

In the event that these Subsidiaries continue to incur losses, our Company's consolidated results of operations and financial condition may be adversely affected. For further details, please refer to the section titled "History and Certain Corporate Matters" beginning on page 92.

(41) Our Company is unable to obtain certain information of one of its Promoter Group Companies, Bharat Industries Limited.

One of our Promoter Group companies, Bhaskar Industries Limited was listed on the Madhya Pradesh Stock Exchange in April 1986. However due to non availability of information with respect to its objects and promise vis-à-vis performance we have not been able to disclose the same in Draft Red Herring Prospectus.

(42) Contingent liabilities could adversely affect our financial condition and are not provided for in our accounts.

As of June 30, 2009, we had contingent liabilities amounting to Rs. 50.67 million in the aggregate, as disclosed in our restated consolidated financial information. In the event that we are unable to meet these contingent liabilities as and when they become due, our business and financial condition may be adversely affected..

(43) Taxes and other levies imposed by the Central or State Governments, as well as other financial policies and regulations, may have an adverse effect on our business, financial condition and results of operations

We are subject to taxes and other levies imposed by the Central or State Governments in India, including customs duties, excise duties, central sales tax, state sales tax, fringe benefit tax, service tax, income tax, value added tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the Central or State Governments may adversely affect our competitive position and profitability. For example, the Central Government has recently introduced a fringe benefit tax payable in connection with certain expenditures incurred by us which has increased our tax liability. We cannot assure you that such tax incentives will continue to be available in the future. Changes in, or elimination of, such tax incentives could adversely affect our financial condition and results of operations.

Risks relating to our Shareholders and the Equity Shares

(44) We will continue to be controlled by our Promoters/Promoter Group and other majority shareholders following this Issue and our other shareholders may not be able to affect the outcome of shareholder voting.

After the completion of the Issue, our Promoters/Promoter Group will collectively hold approximately 86.35% of the fully diluted post-Issue equity capital. Consequently, our Promoters/Promoter Group, and other majority shareholders, acting jointly, may exercise substantial control over us and may have the power to elect and remove a majority of our Directors and/or determine the outcome of proposals for corporate action requiring approval of our Board of Directors or shareholders, such as lending and investment policies, revenue budgets, capital expenditure, dividend policy and strategic acquisitions. Our Promoters/Promoter Group may be able to influence our major policy decisions, including our overall strategic and investment decisions, by controlling the election of our Directors and, in turn, indirectly controlling the selection of our senior management, determining the timing and amount of any dividend payments, approving our annual budgets, deciding on increases or decreases in our share capital, determining our issuance of new securities, approving mergers, acquisitions and disposals of our assets or businesses, and amending our Articles of Association. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company. The interests of our majority shareholders could conflict with the interests of our other shareholders, including the holders of the Equity Shares, and the controlling shareholders could make decisions that materially adversely affect your investment in the Equity Shares.

For further information, please refer to the sections titled "Capital Structure" and "Our Promoters and Promoter Groups" beginning on pages 18 and 119, respectively.

(45) Our Company is unable to disclose information in relation to certain Promoter Group entities.

The companies and other entities owned and/or controlled by Ms. Kishore Devi Agarwal (step-mother of Mr. Ramesh Chandra Agarwal), Ms. Hemalata Agarwal (step-sister of Mr. Ramesh Chandra Agarwal) and Ms. Anuradha Agarwal (step-sister of Mr. Ramesh Chandra Agarwal) form part of our Promoter Group and certain disclosures are required to be made in this regard under the SEBI Guidelines. However, our Company has not received relevant information from such entities required for the purpose of disclosure in this Draft Red Herring Prospectus.

(46) We require certain registrations and permits from government and regulatory authorities in the ordinary course of business and the failure to obtain them in a timely manner or at all may adversely affect our operations.

Our business operates in a highly regulated sector in India. We require certain regulatory approvals, licenses, registrations and permissions to operate our business for which we have applied for or either in the process of making an application. In addition, some of the regulatory approvals, licenses, registrations and permissions required for operating our businesses expire from time to time. We generally apply for renewals of such regulatory approvals, licenses, registrations and permissions prior to or upon their expiry. However, we cannot assure that we will obtain all regulatory approvals, licenses, registrations and permissions that we may require in the future, or receive renewals of existing or future approvals, licenses, registrations and permissions in the time frames required for our operations or at all, which could adversely affect our business. In addition, such approvals if granted may be subject to onerous conditions and may not be on terms as favorable to us as our existing licenses. For further details, please refer to the section titled “Government and Other Approvals” beginning on page 370.

(47) Certain of our Promoter Group entities and ventures entered into by our Promoters have incurred losses during recent fiscal years.

The following promoter group companies have made losses for fiscal year 2006, 2007 and 2008:

(48) There is no existing market for the Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.

Prior to the Issue, there has not been a public market for the Equity Shares. We cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the price you paid in the Issue. The market price of the Equity Shares on the Indian Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- volatility in the Indian and other global securities markets;
- the performance of the Indian and global economy;
- risks relating to our business and industry, including those discussed in this Draft Red Herring Prospectus;
- strategic actions by us or our competitors;
- investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- adverse media reports about us, our shareholders or Promoters;
- future sales of the Equity Shares;
- variations in our quarterly results of operations;
- differences between our actual financial and operating results and those expected by investors and analysts;
- our future expansion plans;
- perceptions about our future performance or the performance of Indian print media companies generally;
- performance of our competitors in the Indian print media industry and the perception in the market about investments in the media sector;
- significant developments in the regulation of the media industry in our key markets;
- changes in the estimates of our performance or recommendations by financial analysts;
- significant developments in India’s economic liberalisation and deregulation policies; and
- significant developments in India’s fiscal and environmental regulations.

There has been significant volatility in the Indian stock markets in the recent past, and our share price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

(49) Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies and are more volatile than the securities markets in other countries. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. During 2008, the NSE and the BSE suffered from a high level of intra-day volatility.

In addition, Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies. These problems have included temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, from time to time, disputes have occurred between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. Similar problems could occur in the future and, if they do, they could harm the market price and liquidity of our Equity Shares.

(50) Future sale of Equity Shares by some of our current shareholders could affect the price of our Equity Shares in the secondary market.

The market price of our Equity Shares could decline if some of our existing shareholders sell a substantial number of Equity Shares post listing or the perception that such sales or distributions could occur. This, in turn, could make it difficult for you to sell Equity Shares in the future at a time and at a price that you deem appropriate.

(51) There can be no assurance that the Equity Shares will be listed on the BSE and the NSE in a timely manner or at all, and any trading closures at the BSE and the NSE may adversely affect the trading price of the Equity Shares.

In accordance with Indian law and practice, permission for listing of the Equity Shares will not be granted until after those Equity Shares have been issued and allotted. There could be a failure or delay in listing the Equity Shares on the BSE and the NSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

(52) There are restrictions on daily movements in the price of our Equity Shares, which may adversely affect a holder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Our Equity Shares are subject to a daily circuit-breaker imposed by all stock exchanges in India which does not allow transactions that would cause volatility in the price of our Equity Shares to exceed a pre-specified level. This circuit-breaker operates independently of the index-based market-wide circuit-breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit-breaker is set by stock exchanges based on the historical volatility in the price and trading volume of our Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit-breaker from time to time, and may change it without our knowledge. This circuit-breaker effectively limits the upward and downward movements in the price of our Equity Shares on a day to day basis and therefore affects price movements in our Equity Shares. As a result of this circuit-breaker, there can be no assurance regarding the ability of Shareholders to sell Equity Shares or the price at which Shareholders may be able to sell their Equity Shares at a particular point in time.

(53) Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors. There can be no assurance that we will be able to pay dividends. Additionally, we may be prohibited by the terms of our proposed debt financing to make any dividend payments until certain time period as may be agreed with lenders.

(54) You will not be able to sell immediately on an Indian stock exchange any of the Equity Shares you purchase in the Issue.

The Equity Shares will be listed on the NSE and the BSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Investors' book entry or "demat" accounts with depository participants in India are expected to be credited within two working days of the date on which the basis of allotment is approved by the NSE and the BSE. Thereafter, upon receipt of final approval from the NSE and the BSE, trading in the Equity Shares is expected to commence within seven working days of the date on which the basis of allotment is approved by the Designated Stock Exchange. We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified above.

External Risk Factors

(55) Our ability to raise capital from foreign investors is limited by current Indian laws.

Foreign investment in the print media industry and FM broadcasting is regulated by MIB and the Government of India. Further the FDI policy, as issued by the Ministry of Commerce and Industry, Department of Industrial Policy and Promotion and the Government of India, from time to time lays down the FDI cap in various sectors/activities. MIB by its revised guidelines dated July 13, 2006 ("**MIB Guidelines**") which supersedes the previous guidelines dated July 13, 2005 regulates foreign investment in Indian entities publishing newspapers and periodicals dealing with news and current affairs. The MIB Guidelines state that FDI (which includes foreign direct investments by NRIs and PIOs) and portfolio investments by recognized FIIs together, is permitted up to a ceiling of 26% of paid-up equity capital, in Indian entities publishing newspapers dealing with news and current affairs, with prior permission of the Government of India.

Further, Press Note 7 of 2008 series issued on June 16, 2008 which consolidates the cap in FDI applicable to various sectors and the "Policy on expansion of FM radio broadcasting services through private agencies (Phase-II)" issued by MIB on July 13, 2005, provides that the total foreign investment, including FDI, including FDI by OCBs/NRIs/PIOs etc., portfolio investments by FIIs and borrowings, if these carry conversion options, is permitted to the extent of not more than 20% of the paid up equity in the entity holding a permission for a radio channel ("**FM Policy**"). Subsequently by an amendment to FM Policy, dated September 24, 2008, MIB shall consider requests for change in ownership of the company owning FM license, within five years from the date of operationalisation of the permission, subject to compliance with certain conditions, which was not permitted earlier. For further details on regulations governing print media and FM broadcasting, please refer to the section titled "Regulations and Policies in India" beginning on page 82.

(56) Political instability or changes in the Government of India could adversely affect economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization and financial sector reforms. The government dissolved parliament on May 18, 2009 and following the general elections held during April and May 2009, a new coalition Government of India, was formed on May 22, 2009. The new cabinet was sworn in on May 28, 2009. The new Government of India has announced its general intention to continue India's current economic and financial sector liberalization and deregulation policies. However, there can be no assurance that such policies will be continued and a significant change in the Government of India's policies in the future could affect business and economic conditions in India and could also adversely affect our business, prospects, financial condition and results of operations.

(57) Financial instability in Indian financial markets could adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in Asian emerging market countries. Financial turmoil in Asia, the United States of America, Europe and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have

adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other markets may increase volatility in Indian financial markets and, indirectly, in the Indian economy in general.

(58) A slowdown in economic growth in India could cause our business to suffer.

Our performance and growth is dependent on the health of the Indian economy. India's economy could be adversely affected by a general rise in interest rates, adverse weather conditions, commodity and energy prices or various other factors. Any slowdown in the Indian economy may adversely affect our business and financial performance and the trading price of the Equity Shares.

(59) Significant differences exist between Indian GAAP and U.S. GAAP as well as valuation methods and accounting practices in the media industry which may be material to the restated financial statements prepared and presented in accordance with SEBI Guidelines contained in this Draft Red Herring Prospectus.

As stated in the reports of our auditors included in this Draft Red Herring Prospectus, the restated financial statements included in this Draft Red Herring Prospectus is based on the financial information which is based on the financial statements which are prepared and presented in conformity with Indian GAAP and no attempt has been made to reconcile any of the information given in this Draft Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP. Significant differences exist between Indian GAAP and U.S. GAAP, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Red Herring Prospectus. In addition, there are no standard valuation methodologies or accounting practices used by emerging media companies and related industries. Therefore the financials of the Company are not comparable with other companies in the industry. We have made no attempt to quantify the effect of any of those differences. In making an investment decision, investors must rely upon their own examination of us, the terms of the offering of the Issue and the financial information contained in this Draft Red Herring Prospectus.

(60) Changes in the foreign exchange regulations resulting in entry of foreign competitors or infusion of additional capital in our competitors may adversely affect our business.

Amendments to the prevalent foreign exchange regulations in the newspaper industry may result in the entry of foreign competitors or the infusion of additional capital into our competitors thereby increasing a possibility of loss of market share and consequent decline in revenue.

(61) Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and future financial performance our ability to obtain financing for capital expenditures, and the price of our Equity Shares.

(62) Exchange rate fluctuations may adversely affect our financial performance.

As a media company, we are exposed to exchange rate risk. Newsprint, which is an essential to printing our papers, is generally priced in US dollars and many of our capital expenditures for printing presses and other machines are also priced in foreign currencies, in particular US dollars and Euros. In addition, our future capital expenditures, including any imported equipment and machinery, may be denominated in currencies other than Rupees. We may also incur borrowings in U.S. dollars or other foreign currencies. Therefore, declines in the value of the Rupee against U.S. dollar or other foreign currencies would increase the Rupee cost of servicing and repaying those borrowings and their value in our balance sheet. Conversely, appreciation of the Rupee versus the U.S. dollar will result in lower revenues in Rupee terms, which could adversely affect our profitability. The exchange rate between the Rupee and the U.S. dollar has changed substantially in recent years and may continue to fluctuate significantly in the future. Although we may in the future enter into hedging arrangements against currency exchange rate risks, there can be no assurance that these arrangements will successfully protect us from losses due to fluctuations in currency exchange rates. Adverse movements in foreign exchange rates may adversely affect our results of operations and financial condition.

(63) Terrorist attacks, civil disturbances and regional conflicts in India and the rest of the world may have an adverse effect on our business and on the market for securities in India.

Certain events that are beyond our control, including terrorist attacks and other acts of violence or war, including those involving India, the United States, the United Kingdom or other countries, may adversely affect worldwide financial markets and could potentially lead to economic recession, which could adversely affect our business, results of operations and financial condition, and more generally, any of these events could lower confidence in India as an investment destination. Southern Asia has, from time to time, experienced instances of civil unrest and hostilities among neighbouring countries. Furthermore, if India were to become engaged in armed hostilities, particularly hostilities that were protracted or involved the threat or use of nuclear weapons, we might not be able to continue to operate. India has witnessed communal clashes in the past. Although such clashes in India have, in the recent past, been sporadic and have been contained within reasonably short periods of time, any such civil disturbance in the future could result in disruptions in transportation or communication networks, as well as have adverse implications for general economic conditions in India. Such events could have an adverse affect on our business, on the value of our Equity Shares and on your investment in our Equity Shares.

(64) Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.

India has experienced natural calamities, such as earthquakes, tsunamis, floods and drought in the past few years, which have had an adverse impact on the Indian economy. The erratic progress of a monsoon would also adversely affect sowing operations for certain crops. The occurrence of any such natural calamities in the future could have a negative impact on the Indian economy, adversely affecting our business and the price of our Equity Shares.

(65) We are subject to risks arising from interest rate fluctuations, which could adversely affect our business, financial condition and results of operations.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of funds will increase. This may adversely impact our results of operations, planned capital expenditures and cash flows. Although we may in the future enter into hedging arrangements against interest rate risks, there can be no assurance that these arrangements will successfully protect us from losses due to fluctuations in interest rates.

(66) Outbreak of contagious diseases in India may have a negative impact on the Indian economy.

Recently, there have been threats of epidemics in the Asia Pacific region, including India and in other parts of the world. If any of our employees are suspected of having contracted any of these infectious diseases, we may be required to quarantine such employees or the affected areas of our facilities and temporarily suspend part or all of our operations. Further, the fear of contracting such contagious diseases could prevent our clients from traveling to India or to other parts of the Asia Pacific region and could restrict our employees from traveling outside India, which would have a material adverse effect on our business, financial condition and results of operations and could cause the price of our Equity Shares to decline.

Our Competitive Strengths

We are one of the leading print media companies in India, with an impressive footprint, circulation and readership. We believe our key strengths are:

- *We have strong established brands in the Indian print media business.* We are one of the leading print mediahouses in India, and we believe that our brands command respect and credibility and offer us competitive advantages when entering new markets in India. We continually invest in building our brands by promoting our corporate identity and reinforcing our key strengths. Our flagship newspapers, *Dainik Bhaskar*, *Divya Bhaskar* and *Saurashtra Samachar* have a combined average daily readership of 15.5 million readers, making us the most widely read broad-sheet newspaper group in India (*Source: IRS 2009*). We are one of the fastest growing major newspaper groups in India, with a growth rate in readership of more than 5.0% from 2003 (with a combined average daily readership of approximately 14.7 million readers) to 2009 (with a combined average daily readership of 15.5 million readers) (*Source: IRS 2003 (Round 2) & IRS 2009*).
- *Our geographical reach and leadership in key markets.* We have a presence in a substantial portion of North, Central and Western India, which is a key strength and advantage over our competitors. *Dainik Bhaskar* is the market leader in terms of readership in the daily newspaper segment in Madhya Pradesh, Chattisgarh, Chandigarh and Haryana (*Source: IRS 2009*). In every single market in which *Dainik Bhaskar* has operated for more than three years (i.e. Madhya Pradesh, Chattisgarh, Rajasthan, Chandigarh and Haryana), it is also the leading newspaper in terms of readership (*Source: Urban IRS 2009*). In Punjab, where we launched operations in October 2006, we are among the top three leading publications of the state (*IRS 2009*). *Divya Bhaskar*, our Gujarati language newspaper, has the largest average daily circulation across Gujarat (*Source: ABC July to December 2008*).
- *Our ability to identify and capitalize upon new market opportunities in local and regional areas and reach new readers and advertisers.* We believe that we have an innovative approach to exploring new market opportunities in local and regional areas, which has allowed us to expand the market and compete with established competitors to become one of the market leaders in local and regional publishing. We continually seek to identify new opportunities for geographic and brand extension. We analyze the size of each potential local market according to metrics such as the percentage of the population who read newspapers compared to the percentage of the population who can read. We then compare these metrics against demographically similar but more established markets in order to identify market opportunities. We then develop and implement large scale strategies to enter and expand into these new local markets. For example, within three years of launching *Divya Bhaskar* in Gujarat, the number of Gujarati newspaper readers increased by 32.0% (*Source: IRS 2003 (Round1) & IRS 2006 (Round 1)*). The launch of our Ahmedabad edition has been used as a case study by the Indian Institute of Management (“IIM”), Ahmedabad, and the launch of our Jaipur edition has been used as a case study by the Mudra Institute of Communications, Ahmedabad (“MICA”). By applying this methodology to expand our business, we have grown from being a single-state, five-edition newspaper business just over a decade ago to a strong player in the newspaper industry with a presence in 11 states, publishing 48 editions in three different languages.
- *Efficient and speedy execution ability.* Our management team has a strong track record for executing new market launches with speed and efficiency. We conduct market surveys and channel the survey results back to our management and editorial teams, enabling us to create newspapers that respond to the needs of our reading population. For example, we launched the Ahmedabad edition of *Divya Bhaskar* within 6 months from the conceptualization of the project to expand into Ahmedabad. Our strong survey team for identifying new markets allowed us to survey over 0.80 million households, and we generated circulation of 0.45 million copies on the day of launch. As already indicated above, this launch has been used as a case study by the IIM.
- *Robust marketing strategy.* Launching in new markets requires substantial logistical and personnel resources in order to solicit consumer input and develop consumer relationships on a large scale. We have the benefit of ground level research and direct contact with consumers, which helps us to accurately identify and target new consumers. Our robust marketing strategy enables us to depend less on traders and stockists for the purposes of marketing our newspapers and publications. For example, in the first month of publication of *Dainik Bhaskar* (Punjab edition) in Amritsar and Jalandhar, we managed to obtain approximately 161,000 annual subscriptions out of a total circulation of approximately 201,000 for the newspaper through direct contact with consumers.

- *Strong connection with consumers.* We believe that we have succeeded in creating newspapers that are “by the people, for the people and of the people”, which means that we strive for our newspapers to address the specific interests and needs of our consumer base so that they feel an affinity with our newspapers. We are committed to developing multiple communication channels through which we are able to interact directly with our existing and prospective consumers (“touch points”). These touch points are developed through the use of special interest supplements, which cater to different age groups and interests and which are circulated with our newspapers. We also obtain consumer feedback on a continual basis and modify our publications according to their needs and interests.
- *Strong connection with advertisers.* We have strong relationships with over 251,000 advertisers as of June 2009 at both the local and national levels. We believe we have positioned ourselves as an integrated media business that is well-placed to consolidate our share of advertisement expenditure oriented toward the local customer. Our knowledge of local markets and understanding of local consumers is a powerful tool for attracting advertisers, such as Maruti Suzuki Ltd., LG Electronics India Pvt. Limited and Samsung India Electronics Pvt. Ltd., who develop targeted advertisement solutions in partnership with us.
- *Credible and respected editorial team.* Our editorial team has substantial experience in the field of journalism. It is well-respected in the print media industry, as evidenced by the numerous journalistic awards which it has won for the quality of its work. For example, in 2004 we received a Silver Award in the category of Best in Info-graphic Newspapers from the IFRA. We are committed to editorial independence and encourage our editorial team to continue to report from an unbiased and objective perspective. We believe that editorial content is a critical driver of our business, and we intend to maintain our editorial quality and objective approach to reporting.
- *Experienced and capable management team.* Our management team consists of experienced and dedicated individuals. Our Promoters have also been involved in the print media business for over five decades. Our management team emphasizes an “ear to the ground” approach, which means we are constantly seeking to identify and understand gaps in the market and changing market dynamics and trends, and develop ideas for new publications to address these. Our Company’s management has been recognized and won many awards in the newspaper industry. In 2006, one of our Directors, Mr. Girish Agarwal, won the Ernst and Young “Young Entrepreneur of the Year 2006” award. We have been awarded the “Innovation for India Award” by the Marico India Innovation Foundation for business process innovation in relation to the launch of *Divya Bhaskar* and gold awards at the Asian Publishers Management Association awards in Kuala Lumpur for *Dainik Bhaskar Punjab* in the “Best Launch of a Title” and “Best Circulation Drive” categories. In 2009, we received an award from the International Newspaper Marketing Association (INMA) for print advertising sales and retention as well as for our public relations and community service. We also received an award in 2009 from the Global Youth Marketing Forum for our television advertisements and corporate film. In 2008, we received an Asian Publishing Award for content creation and multimedia advertising. We have an ISO 9001:2000 certification and are the only Hindi language newspaper to have been awarded such certification.

Our Strategy

Our strategy is to enhance our position as one of the leading print media companies in India and to increase our market share and profitability. We also intend to expand our presence in the media industry as a whole. To achieve these goals, we intend to:

- *Tap into India’s media growth potential.* India is one of the fastest-growing media markets in the world, with current advertisement expenditure at only 0.47% of GDP per capita as compared to global advertisement expenditure, which is approximately 0.9% of GDP per capita (*Source: FICCI-KPMG Report 2009*). Overall advertisement expenditure is expected to grow at the rate of 12.4% per annum from 2008 to 2013, and we intend to position ourselves to take advantage of this growth potential (*Source: FICCI-KPMG Report 2009*).
- *Implement a cross-media strategy that will position us as a media market partner.* We are focused on developing multiple touch points into each household by continuing to add supplements to our newspapers, new journals and non-print media distribution channels such as radio and the internet. Through SMEL, we operate 17 FM radio stations. Through our subsidiary, IMCL, we operate internet portals and SMS portals. We expect a bright future and excellent growth potential for these businesses.

Our plan is to offer our customers integrated media solutions. For example, in 2007 we acted as the sole franchisee in India for a promotional campaign to have the Taj Mahal designated as one of the new 7 wonders of the world in which Hindustan Unilever Limited, through their brand M/S Fair and Lovely, was the lead sponsor. The campaign involved coordination among IMCL (digital media), SMEL (FM radio) and one of our divisions, DB Activation (ground promotion), to deliver a single media market promotional product.

- *Continue to identify new opportunities for geographic and brand expansion.* Under the direction of our experienced management team, we expect to continue to enhance and improve our methodology for the identification of new markets and the implementation of successful market entry strategies, and continue to identify new opportunities for growth and brand expansion through both organic and inorganic growth. We have recently launched several new editions, including in Ratlam, Jagdalpur, Bhillai, Nagour, Pali, Shimla, the 7 editions of *Business Bhaskar* and the two editions of *DB Star*.
- *Continue to develop our extensive distribution platform.* As of June 30, 2009, we managed and operated 3,447 distributors, 22 sales offices and approximately 515 bureau offices. We benefit from our large scale distribution platform when launching new publications in existing markets by seeking the assistance of our distributors in obtaining subscriptions for these new publications from subscribers of existing publications.
- *Localization of content.* We aim to continue to localize content through offering a broad range of publications in different languages and, through SMEL, operating radio stations which cater to local tastes. We believe that this localization of content is a key method of connecting with consumers and sustaining their interest in our publications and SMEL's radio stations. In addition, we believe that localization of content allows us to enhance our connection with advertisers by allowing us to deliver more relevant advertisement solutions.
- *Enter the English print segment.* In order to expand the reach of our advertisers, we believe that it is important to create alternative language products which cater to younger audiences and the increasingly cosmopolitan population of India. We have entered into a publication license agreement with DMCL in relation to the printing and publication of an English daily newspaper, *DNA*, on a franchisee basis in Gujarat and Rajasthan. For further details, please refer to the section titled "History and Certain Corporate Matters" beginning on page 92.
- *Focus on local advertisers.* While building on the strength of our relationships with current advertisers, we are also expanding our local advertising base by acting as media strategists who can help smaller advertisers who had previously not used the print media, thereby expanding our advertiser and revenue base.
- *Franchising publications.* We have recently entered into a publication license agreement with DMCL in relation to the printing and publication of an English daily newspaper, *DNA*, on a franchisee basis in Gujarat and Rajasthan. For further details, please refer to the section titled "History and Certain Corporate Matters" beginning on page 92. We may in the future enter into other franchising arrangements with other parties when strategic opportunities arise.
- *Event management.* DB Activation, a division of our Company, is engaged in organizing activities such as road shows, mall activities, live entertainment shows, trade shows, conferences, trade meetings, exhibitions and shopping festivals. Recently, we successfully hosted a world record tea party with the aim of bringing world-wide distinction to the city of Indore. With 32,618 people attending the tea-party, it doubled the previous record of 14,918, setting a new Guinness World Record. The event was sponsored by Hindustan Unilever Limited (Brooke Bond Red Label) and the Tea Board of India (a Government of India enterprise responsible for promoting the tea industry). This was a multi-media effort planned and executed over a three month period by *Dainik Bhaskar*. We foresee significant growth potential for this business and intend to continue to devote our efforts towards its expansion.

Illustration of Book Building Process and the Price Discovery Process

(Investors should note that the following is solely for the purpose of illustration and is not specific to this Issue)

Bidders (excluding ASBA Bidders who can Bid only at Cut-Off Price) can bid at any price within the Price Band. For instance, assuming a price band of Rs. 20 to Rs. 24 per share, an issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book as shown below indicates the demand for the shares of the issuer company at various prices and is collated from bids from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of shares is the price at which the book cuts off, i.e., Rs. 22 in the above example. The issuer, in consultation with Book Running Lead Managers, will finalise the issue price at or below such cut-off, i.e., at or below Rs. 22. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

Our Company and/or the Selling Shareholder, in consultation with Book Running Lead Managers, reserve the right not to proceed with this Issue at any time after the Bid/Issue Opening Date but before the meeting of our Board for approval of Allotment, without assigning any reason thereof. Notwithstanding the foregoing, this Issue is also subject to obtaining the final listing and trading approvals of the Stock Exchanges, which our Company shall apply for after Allotment, and the final RoC approval of the Prospectus after it is filed with the RoC. In terms of the SEBI Guidelines, QIBs shall not be allowed to withdraw their Bids after the Bid/Issue Closing Date and ASBA Bidders shall not be allowed to revise their Bids.

Details of the objects

A. Setting up new publishing units

Our Company proposes to set up two new publishing units (“**Publishing Units**”) for printing and publishing new editions. These new editions will expand our business to areas where we do not currently have a presence. Each new publishing unit is proposed to have a capacity for printing 50,000 newspaper copies per hour. Our total cost for setting up the Publishing Units is estimated to be approximately Rs. 600 million, which will be entirely funded out of the Net Proceeds. We intend to utilise part of the Net Proceeds, for the following purposes: (i) erection and establishment of printing press; (ii) procurement of printing press and setting up of IT infrastructure; (iii) office equipments, furniture and fixtures; and (iv) pre-operating expenses. We estimate the Publishing Units to be fully operational by Fiscal 2012.

The Publishing Units shall be set up in an area of approximately 6,000 square yard. We are currently in the process of identifying a suitable site for setting up the Publishing Units. For the purposes of setting up the publishing units we *inter alia* require approvals from the District Magistrate, RNI and other statutory authorities. We have currently not applied for any approvals with respect to the Publishing Units, to be set up, out of the Net Proceeds.

The details of our proposed utilisation of Net Proceeds for setting up the Publishing Units are as follows:

2. Chhattisgarh;
3. Rajasthan; and
4. Gujarat.

The details of our proposed utilisation of Net Proceeds for upgrading existing plant and machinery are as follows:

Total	305	189	116

(a) We intend to install ink pumping system in some of our centres, where we print an average of 100,000 copies of newspapers per day. Installation of the ink pumping system would enable us to save our ink consumption and thereby reduce our costs.

(b) We have not installed fully automated computer to plate (“CTP”) system in some of our centres. We intend to install CTP in these centres where we currently do not have fully automated CTP system. Installation of CTP system would reduce our printing time, costs and enhance the print quality.

(c) We intend to install ink jet CTP, a new technology, at some of our centres. This new technology is useful in centres having lower pagination and print run, to eliminate process like output on tracing paper, manual pasting and imposition of pages and plate making.

(d) We intend to install complete mail room equipment, to facilitate online conveying of the copy, from the printing machine to compensating stacker. Further, such copies would be collated in bundles packed by straps in a single part without any manual intervention, thereby saving time.

(e) We intend to deploy fork lift at some of our centres to mechanically unload from the truck and stack newsprint in the warehouse and thereby reduce wastage and damage to the usable paper.

(f) In some of our centres, we intend to upgrade our IT, communication infrastructure and video conferencing facility to bring in active collaboration between interacting departments.

C. Sales and marketing

To promote and augment our brand visibility, we intend to undertake sales and marketing initiatives. We believe these initiatives would also enhance the market share of our editions. Further our proposed marketing efforts will include brand-building activities through mass communications using various media including television, press and event sponsorships.

The details of our proposed utilization of the Net Proceeds for funding our sales and marketing expenses are provided below:

Capital assets are to be categorised into short-term capital assets and long-term capital assets based on the period of holding. All capital assets [except shares held in a company or any other security listed in a recognised stock exchange in India or units of Unit Trust of India ('UTI') or Mutual Fund units specified under section 10(23D) of the IT Act or zero coupon bonds] are considered to be long-term capital assets, if they are held for a period exceeding thirty-six months. Shares held in a company or any other security listed in a recognised stock exchange in India or UTI or Mutual Fund units specified under section 10(23D) of the IT Act or zero coupon bonds are considered as long-term capital assets, if these are held for a period exceeding twelve months.

As per the provisions of section 112 of the IT Act, long-term capital gains [other than those covered under section 10(38) of the IT Act] are subject to tax at a rate of 20% (plus applicable surcharge and cess). However, proviso to section 112(1) specifies that if the long-term capital gains [other than those covered under section 10(38) of the IT Act] arising on transfer of listed securities or units or zero coupon bond, calculated at the rate of 20% with indexation benefit exceeds the capital gains computed at the rate of 10% without indexation benefit, then such capital gains are chargeable to tax at the rate of 10% without indexation benefit (plus applicable surcharge and cess).

However, from Assessment Year 2007-08, such long-term capital gains will be included while computing book profits for the purpose of payment of Minimum Alternate Tax ("MAT") under the provisions of section 115JB of the IT Act.

As per provisions of section 111A of the IT Act, short term capital gains arising from transfer of short term capital asset, being an equity share in a company or a unit of an equity oriented fund shall be

taxable at the rate of 15% (plus applicable surcharge and cess), if such sale is entered into on or after October 1, 2004 and the transaction is chargeable to STT.

3. Exemption of capital gain from income-tax

If only part of such capital gain is invested, the exemption shall be proportionately reduced.

However, if the non-resident shareholder transfers or converts the notified bonds into money (as stipulated therein) within a period of three years from the date of their acquisition, the amount of capital gains exempted earlier would become chargeable in such year. The bonds specified for this section are bonds issued on or after April 1, 2006 by NHAI and REC. The IT Act has restricted the maximum investment in such bonds upto Rs 50 lacs per assessee during any financial year.

Further, as per the provisions of section 54F of the IT Act and subject to conditions specified therein, long-term capital gains (other than a capital gains arising on sale of resident house and those covered under section 10(38) of the IT Act) arising to an individual or HUF on transfer of shares of the Company will be exempted from capital gains tax, if the net consideration from such shares are used for either purchase of residential house property (subject to prior approval from Reserve Bank of India) within a period of one year before or two years after the date on which the transfer took place, or for construction of residential house property within a period of three years after the date of transfer.

SECTION IV – ABOUT US

INDUSTRY OVERVIEW

Unless otherwise indicated, all financial and statistical data relating to the media industry in India in the following discussion is derived from the India Readership Survey (“IRS”), the 2009 joint Federation of Indian Chambers of Commerce and Industry (FICCI) and KPMG Media & Entertainment Industry Report (the “FICCI-KPMG Report”) and other industry reports. The data may have been re-classified by us for presentation purposes.

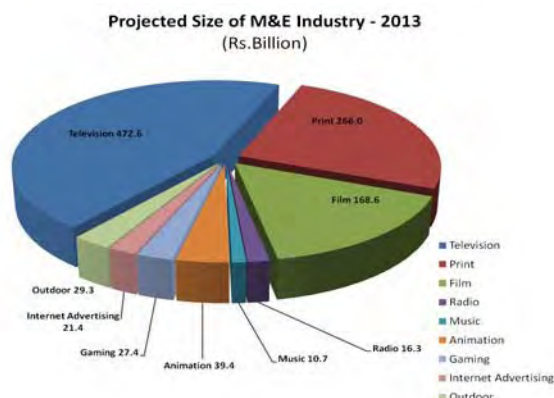

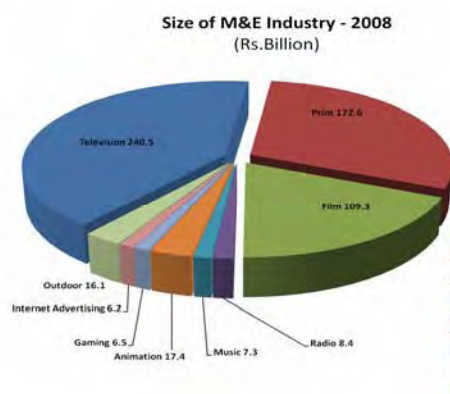

Overview of Media and Entertainment Industry

Current Size

The media and entertainment industry of India is comprised primarily of television, print, film, radio, music, animation, outdoor advertising and gaming. The industry is one of the fastest growing sectors in the Indian economy benefiting from a fast growing economy and favorable demographics. As of 2008, the annual revenue in the Indian media and entertainment industry was Rs 584.0 billion which represented a growth of 12.4% from the previous year. However, due to the economic slowdown in 2008 growth in the media and entertainment industry, like all industries, was impacted. For individual media companies, new challenges have emerged from greater fragmentation of audiences across media, new distribution platforms and greater accountability and measurability demanded by advertisers.

Growth Prospects

The demographics in India indicate a favorable outlook for products and services in general and the media and entertainment industry in particular. India's GDP increased 9.3% in 2007, 7.3% in 2008 and is projected to grow 6.7% in 2009 (RBI First Quarter Review 2009). In addition, the average Indian consumer is getting younger. Currently, 70.0% of India's population is below 35 years of age, and it is projected that more than half of India's population will be under the age of 30 in 2015. The emergence of this young middle class with greater earning power and higher disposable income provides potential for increased marketing and advertising spending in India.

Source: FICCI-KPMG Media Entertainment Industry

Overall growth in the media and entertainment industry will be driven by factors such as increased regionalization of content, deregulation and convergence of different forms of media.

Source: FICCI-KPMG Media Entertainment Industry

However, in the short term, the current economic slowdown and the reduction in GDP growth is expected also to impact the media and entertainment industry. In the past 3 years, revenue in the industry has grown 17.1% but is projected to grow 12.4% over the next 5 years to reach Rs 1,052 billion in revenue in 2013.

Rural

The IRS has designated four SEC in rural India in terms of the type of house and the education of the chief wage earner of the household. The four SEC are labeled R1, R2, R3, and R4. R1 denotes the uppermost socio-economic class and R4 denotes the lowest such socio-economic class. Set forth below is a summary of media penetration in rural India across the various media categories (excluding the

internet) based on SEC and the percentage of people in each SEC with access to such media.

As shown in the tables above, print media penetration in rural and urban India is higher, percentage-wise, among people in the upper socio-economic classes compared with those in the lower socio-economic classes. However, due to the sheer number of people who fall into the lower socio-economic classes, the number of readers in rural and urban India in the lower socio-economic classes outnumbers those in the upper socio-economic classes on an absolute basis, which indicates that there is plenty of potential for growth in readership numbers in rural and urban India.

Advertising Revenues

Revenues derived from advertising spending is one of the main drivers behind the growth of the Indian media and entertainment industry. From 2006 to 2008, revenues from advertising were estimated to have grown at a CAGR of 17.1%. However, going forward, the revenues from advertising is expected

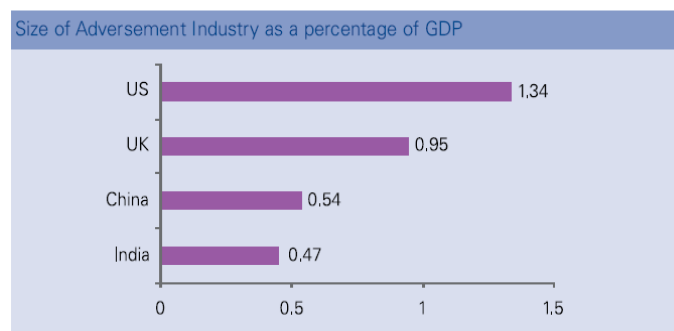

to exhibit a lower growth rate due to the turbulent macroeconomic environment, with advertising revenues growing at a CAGR of 12.4% from 2009 to 2013.

However, there is still potential for long term growth in advertising spending as the ratio of advertising spending to GDP in India has shown a slow but distinct growth trend in the past few years and is still far behind similar ratios in the U.S. and U.K.

Key Government and FDI policy

The entertainment and media industry in India has traditionally been dominated by strategic investors. However, the industry has benefited from the liberalization of rules and regulations relating to foreign direct investment. Films, television and other segments of the industry have been open for foreign direct investment for some time. In 2005, foreign direct investment was permitted in two important sectors – print media and radio. In the print media segment, 100.0% foreign direct investment and ownership is now allowed for non-news publications, such as scientific or technical journals, as well as facsimile editions of foreign newspapers and 26.0% foreign direct investment and ownership is permitted for news publications. The easing of foreign direct investment restrictions has allowed private equity to begin playing a major role in reshaping many segments of the entertainment and media industry in India. Additional guidelines and regulations have also been issued allowing print media companies to provide editions of foreign newspapers that can be made available to Indian readers where previously they were only imported into the country. The addition of foreign newspapers to the Indian print media market may have the effect of adding to an already competitive

market. With respect to FM radio broadcasting services, foreign direct investment has been permitted up to 20% of the paid up capital, subject to such terms and conditions as specified from time to time by MIB. Further the amendment dated September 24, 2008 to “Policy on Expansion of FM Radio Broadcasting Services Through Private Agencies (Phase-II)” issued by MIB on July 13, 2005, has permitted MIB to consider requests for transfer of shares for the purpose of creation of a subsidiary company, amalgamation of companies of the same group, de-merger of company within the period of five years, subject to the fulfillment of certain conditions. Such alteration in the capital structure was not permitted under the policy prior to the amendment. For further details please refer to the section titled “Regulations and Policies of India” on page 82.

Overview of Print Media

With a readership base of over 250 million readers, India is the second largest print market in the world, however, it is highly fragmented with over 60,000 newspapers printed in 22 languages. Revenues within the Indian print media industry grew at an annual rate of 13.8% from 2005 to 2008, which is higher than that experienced in other developed countries. Long term prospects for growth remain favorable as there is a population of approximately 359.0 million who are literate but do not currently read any publication in India.

Newspaper publishing currently dominates the India print media industry and is expected to do so in the future, comprising approximately 92.0% of the total revenues of the industry in 2013. Revenues from newspaper publishing is expected to grow at a compounded annual rate of 9.1% over the next 5 years and is projected to reach Rs. 245.4 billion by 2013. The magazine publishing segment is expected to grow at a compounded annual rate of 8.1% over the next 5 years and is projected to reach Rs. 20.6 billion in size in 2013.

Regional and Language Trends in Print

Traditionally, national coverage of news in India has predominated over local and regional news. However, recently the newspaper industry has witnessed an increase in the establishment of more locally focused content. In most cases, it has consisted of established newspapers benefiting from their existing strengths to expand into newer geographies, which are otherwise dominated by a few highly entrenched newspapers. Aggressive competition among these regional newspapers has resulted in price competition, and established media companies in particular regions are reducing their cover prices as a strategy to retain their circulation base.

One of the major factors behind such high interest levels in regional media is the growing market in Tier 2 cities (cities having population of 10-40 lakhs) and Tier 3 cities (cities having a population in between 5-10 lakhs). Tier 2 cities are experiencing the highest growth rate in the number of households, growing 7.4% from 2005 to 2007. Tier 3 cities witnessed 6.9% growth in the number of households from 2005 to 2007 as compared to a 6.6% rate in Tier 1 cities (cities having a population greater than 40 lakhs). As a result, it is estimated that by 2025 the combined population of Tier 2 and 3 cities will equal the population of Tier 1 cities.

In addition, more than 69.0% of India's population lives in rural areas. With literacy rates in India growing from 62.5% in 2002 to over 73.0% in 2007 generally, growing literacy in rural areas will drive print media circulation as well in these areas.

Set forth below is a table showing a breakdown of the print media industry by total number of readers and the percentage of the population who are readers as per IRS 2009, suggesting room for expansion of readers in rural areas.

	Urban & Rural		Urban		Rural

Any Magazine	89,090	10.5	47,566	17.7	41,524	7.1

The growth in regional and local advertising also is quite significant. This has been driven by new advertising sectors such as education, hospitality, real estate and jewellery – which are often local brands and therefore advertise through local advertising campaigns. It is projected that as the importance of regional media grows across the media and entertainment sub sectors, the difference in

advertising rates between national and regional media is expected to narrow further and hence advertising spending is expected to be much more evenly spread between national and regional media. For the media companies this is likely to mean an increasing focus on innovation and customization to create specific content for regional media audiences.

This growing shift toward regional and local media is also related to the predominance of Hindi and vernacular newspapers. Hindi language newspapers comprise 44.6%, while English language newspapers comprises 7.4% of the total registered dailies. Of the total readership of the top 10 daily newspapers in India, English newspapers receive only 11.0% of the total readership.

Like the discrepancy between national and regional advertising, historically there was a substantial mismatch between readership numbers and advertising revenue for English and Hindi newspapers. Hindi newspapers seldom received a share of advertising revenues commensurate with their readership numbers as compared to English newspapers. However, due to the expansion of regional and vernacular newspapers and the growth of local advertising, this gap between the share of advertising revenues and readership is decreasing, resulting in higher revenues for regional and Hindi media.

Innovation in Advertising

Niche Content

One means by which newspapers are pursuing growth is through the use of specialty newspaper supplements and compacts that provide content targeted to certain regions or interest groups. As Indian consumers become more discerning in their choices, the model of "one size fits all" will be less viable for the print media. Over the past year, the print media market has witnessed the increasing proliferation of compact, smaller format dailies like *Mint*, *Metro Now*, *Mail Today* and most recently the *Hindustan Times Cafe* in Mumbai. These supplements and compacts provide newspapers a better product to offer advertisers as it allows advertisers the ability to target their particular market more efficiently. Advertisers have realized the need for local campaigns and hence media planners are finding the regional media attractive to reach the local consumers. As discussed above, historically there was a discrepancy between the readership figures and advertising revenues for regional media companies as opposed to national media companies. This gap is now reducing resulting in higher revenues for regional media companies and the growing use of targeted regional supplements and compacts. Supplements also allow newspapers to target youth and female readership, drawing advertisers who normally go to magazines for these segments. These specialized supplements also help to retain those segments of readers who are most susceptible to changing to competing media or other print media companies.

Equity Barter Deals

In addition to the use of supplements, as advertising revenues have declined, print media companies have used equity barter deals to supplement their advertising. An equity barter deal is where two unrelated entities, often companies in different media, provide advertising services to one another agreeing to promote and advertise the other company in their respective media. This type of advertising may consist of publishing advertisements in newspapers or magazines, broadcasting commercials on television or radio, displaying advertisements on websites or advertising through other media. In most cases, no payment is made between the two companies engaging in these equity barter deals.

Online Edition of Print Media

Almost all leading newspapers and magazines in India (both English and other languages) have online editions, providing free access to the latest news and analysis. These electronic versions are used by advertisers also to target Indians living abroad. Globally, electronic versions have emerged as separate revenue models for print media companies with their content differentiated from that in the printed versions. However, in India, these electronic version are primarily electronic reproductions of the printed editions and are used primarily for brand building. In the future, by offering specialized content, online editions offer a potential revenue stream for newspapers.

Print Media Growth Drivers

The Indian print media sector is currently passing through a period of transition with most companies expanding their footprints beyond traditional regions, strong foreign investment into the industry and experimenting with multiple media models. The industry will likely be affected by the following trends:

- Growing preference for local content: Readers look for what they view as an appropriate mix of national, regional and local news. We believe that effective coverage of local and regional events fosters within the reader a feeling of familiarity and closeness to the newspaper, encouraging them to read the paper.
- Niche content: Supplements or other “add-ons” within the main newspaper may target particular demographic or geographic groups of readers, such as women, youths or young children.
- Increased foreign direct investment: The print media sector has attracted significant foreign investment leading to consolidation and reduction of inefficiencies in the industry.
- Bartering transactions: Cost reductions by companies in advertising spending has driven creativity in advertising models.
- Multiple distribution platforms: News made available through internet, radio, television and SMS provide a way for print media companies to compete with emerging alternative media companies.
- Investment in quality improvements: Increasing color proportion and other quality improvements will attract readers and consequently advertisers.

Our Competitive Strengths

We are one of the leading print media companies in India, with an impressive footprint, circulation and readership. We believe our key strengths are:

- *We have strong established brands in the Indian print media business.* We are one of the leading print mediahouses in India, and we believe that our brands command respect and credibility and offer us competitive advantages when entering new markets in India. We continually invest in building our brands by promoting our corporate identity and reinforcing our key strengths. Our flagship newspapers, *Dainik Bhaskar*, *Divya Bhaskar* and *Saurashtra Samachar* have a combined average daily readership of 15.5 million readers, making us one of the most widely read broad-sheet newspaper group in India (*Source: IRS 2009*). We are one of the fastest growing major newspaper groups in India, with a growth rate in readership of more than 5.0% from 2003 (with a combined average daily readership of approximately 14.7 million readers) to 2009 (with a combined average daily readership of 15.5 million readers) (*Source: IRS 2003 (Round 2) & IRS 2009*).
- *Our geographical reach and leadership in key markets.* We have a presence in a substantial portion of North, Central and Western India, which is a key strength and advantage over our competitors. *Dainik Bhaskar* is the market leader in terms of readership in the daily newspaper segment in Madhya Pradesh, Chattisgarh, Chandigarh and Haryana (*Source: IRS 2009*). In every single market in which *Dainik Bhaskar* has operated for more than three years (i.e. Madhya Pradesh, Chattisgarh, Rajasthan, Chandigarh and Haryana), it is also the leading newspaper in terms of readership (*Source: Urban IRS 2009*). In Punjab, where we launched operations in October 2006, we are among the top three leading publications of the state (*IRS 2009*). *Divya Bhaskar*, our Gujarati language newspaper, has the largest average daily circulation across Gujarat (*Source: ABC July to December 2008*).
- *Our ability to identify and capitalize upon new market opportunities in local and regional areas and reach new readers and advertisers.* We believe that we have an innovative approach to exploring new market opportunities in local and regional areas, which has allowed us to expand the market and compete with established competitors to become one of the market leaders in local and regional publishing. We continually seek to identify new opportunities for geographic and brand extension. We analyze the size of each potential local market according to metrics such as the percentage of the population who read newspapers compared to the percentage of the population who can read. We then compare these metrics against demographically similar but more established markets in order to identify market opportunities. We then develop and implement large scale strategies to enter and expand into these new local markets. For example, within three years of launching *Divya Bhaskar* in Gujarat, the number of Gujarati newspaper readers increased by 32.0% (*Source: IRS 2003 (Round1) & IRS 2006 (Round 1)*). The launch of our Ahmedabad edition has been used as a case study by the Indian Institute of Management (“IIM”), Ahmedabad, and the launch of our Jaipur edition has been used as a case study by the Mudra Institute of Communications, Ahmedabad (“MICA”). By applying this methodology to expand our business, we have grown from being a single-state, five-edition newspaper business just over a decade ago to a strong player in the newspaper industry with a presence in 11 states, publishing 48 editions in three different languages.
- *Efficient and speedy execution ability.* Our management team has a strong track record for executing new market launches with speed and efficiency. We conduct market surveys and channel the survey results back to our management and editorial teams, enabling us to create newspapers that respond to the needs of our reading population. For example, we launched the Ahmedabad edition of *Divya Bhaskar* within 6 months from the conceptualization of the project to expand into Ahmedabad. Our strong survey team for identifying new markets allowed us to survey over 0.80 million households, and we generated circulation of 0.45 million copies on the day of launch. As already indicated above, this launch has been used as a case study by the IIM.

- *Robust marketing strategy.* Launching in new markets requires substantial logistical and personnel resources in order to solicit consumer input and develop consumer relationships on a large scale. We have the benefit of ground level research and direct contact with consumers, which helps us to accurately identify and target new consumers. Our robust marketing strategy enables us to depend less on traders and stockists for the purposes of marketing our newspapers and publications. For example, in the first month of publication of *Dainik Bhaskar* (Punjab edition) in Amritsar and Jalandhar, we managed to obtain approximately 161,000 annual subscriptions out of a total circulation of approximately 201,000 for the newspaper through direct contact with consumers.
- *Strong connection with consumers.* We believe that we have succeeded in creating newspapers that are “by the people, for the people and of the people”, which means that we strive for our newspapers to address the specific interests and needs of our consumer base so that they feel an affinity with our newspapers. We are committed to developing multiple communication channels through which we are able to interact directly with our existing and prospective consumers (“touch points”). These touch points are developed through the use of special interest supplements, which cater to different age groups and interests and which are circulated with our newspapers. We also obtain consumer feedback on a continual basis and modify our publications according to their needs and interests.
- *Strong connection with advertisers.* We have strong relationships with over 251,000 advertisers as of June 2009 at both the local and national levels. We believe we have positioned ourselves as an integrated media business that is well-placed to consolidate our share of advertisement expenditure oriented toward the local customer. Our knowledge of local markets and understanding of local consumers is a powerful tool for attracting advertisers, such as Maruti Suzuki Ltd., LG Electronics India Pvt. Limited and Samsung India Electronics Pvt. Ltd., who develop targeted advertisement solutions in partnership with us.
- *Credible and respected editorial team.* Our editorial team has substantial experience in the field of journalism. It is well-respected in the print media industry, as evidenced by the numerous journalistic awards which it has won for the quality of its work. For example, in 2004 we received a Silver Award in the category of Best in Info-graphic Newspapers from the IFRA. We are committed to editorial independence and encourage our editorial team to continue to report from an unbiased and objective perspective. We believe that editorial content is a critical driver of our business, and we intend to maintain our editorial quality and objective approach to reporting.
- *Experienced and capable management team.* Our management team consists of experienced and dedicated individuals. Our Promoters have also been involved in the print media business for over five decades. Our management team emphasizes an “ear to the ground” approach, which means we are constantly seeking to identify and understand gaps in the market and changing market dynamics and trends, and develop ideas for new publications to address these. Our Company’s management has been recognized and won many awards in the newspaper industry. In 2006, one of our Directors, Mr. Girish Agarwal, won the Ernst and Young “Young Entrepreneur of the Year 2006” award. We have been awarded the “Innovation for India Award” by the Marico India Innovation Foundation for business process innovation in relation to the launch of *Divya Bhaskar* and gold awards at the Asian Publishers Management Association awards in Kuala Lumpur for *Dainik Bhaskar Punjab* in the “Best Launch of a Title” and “Best Circulation Drive” categories. In 2009, we received an award from the International Newspaper Marketing Association (INMA) for print advertising sales and retention as well as for our public relations and community service. Our Strategy

Our strategy is to enhance our position as one of the leading print media companies in India and to increase our market share and profitability. We also intend to expand our presence in the media industry as a whole. To achieve these goals, we intend to:

- *Tap into India's media growth potential.* India is one of the fastest-growing media markets in the world, with current advertisement expenditure at only 0.47% of GDP per capita as compared to global advertisement expenditure, which is approximately 0.9% of GDP per capita (Source: FICCI-KPMG Report 2009). Overall advertisement expenditure is expected to grow at the rate of 12.4% per annum from 2008 to 2013, and we intend to position ourselves to take advantage of this growth potential (Source: FICCI-KPMG Report 2009).
- *Implement a cross-media strategy that will position us as a media market partner.* We are focused on developing multiple touch points into each household by continuing to add supplements to our newspapers, new journals and non-print media distribution channels such as radio and the internet. Through SMEL, we operate 17 FM radio stations. Through our subsidiary, IMCL, we operate internet portals and SMS portals. We expect a bright future and excellent growth potential for these businesses. Our plan is to offer our customers integrated media solutions. For example, in 2007 we acted as the sole franchisee in India for a promotional campaign to have the Taj Mahal designated as one of the new 7 wonders of the world in which Hindustan Unilever Limited, through their brand M/S Fair and Lovely, was the lead sponsor. The campaign involved coordination among IMCL (digital media), SMEL (FM radio) and one of our divisions, DB Activation (ground promotion), to deliver a single media market promotional product.
- *Continue to identify new opportunities for geographic and brand expansion.* Under the direction of our experienced management team, we expect to continue to enhance and improve our methodology for the identification of new markets and the implementation of successful market entry strategies, and continue to identify new opportunities for growth and brand expansion through both organic and inorganic growth. We have recently launched several new editions, including in Ratlam, Jagdalpur, Bhilai, Nagour, Pali, Shimla, the 7 editions of *Business Bhaskar* and the two editions of *DB Star*.
- *Continue to develop our extensive distribution platform.* As of June 30, 2009, we managed and operated 3,447 distributors, 22 sales offices and approximately 515 bureau offices. We benefit from our large scale distribution platform when launching new publications in existing markets by seeking the assistance of our distributors in obtaining subscriptions for these new publications from subscribers of existing publications.
- *Localization of content.* We aim to continue to localize content through offering a broad range of publications in different languages and, through SMEL, operating radio stations which cater to local tastes. We believe that this localization of content is a key method of connecting with consumers and sustaining their interest in our publications and SMEL's radio stations. In addition, we believe that localization of content allows us to enhance our connection with advertisers by allowing us to deliver more relevant advertisement solutions.
- *Enter the English print segment.* In order to expand the reach of our advertisers, we believe that it is important to create alternative language products which cater to younger audiences and the increasingly cosmopolitan population of India. We have entered into a publication license agreement with DMCL in relation to the printing and publication of an English daily newspaper, *DNA*, on a franchisee basis in Gujarat and Rajasthan. For further details, please refer to the section titled "History and Certain Corporate Matters" beginning on page 92.
- *Focus on local advertisers.* While building on the strength of our relationships with current advertisers, we are also expanding our local advertising base by acting as media strategists who can help smaller advertisers who had previously not used the print media, thereby expanding our advertiser and revenue base.
- *Franchising publications.* We have recently entered into a publication license agreement with DMCL in relation to the printing and publication of an English daily newspaper, *DNA*, on a

franchisee basis in Gujarat and Rajasthan. For further details, please refer to the section titled “History and Certain Corporate Matters” beginning on page 92. We may in the future enter into other franchising arrangements with other parties when strategic opportunities arise.

- *Event management.* DB Activation, a division of our Company, is engaged in organizing activities such as road shows, mall activities, live entertainment shows, trade shows, conferences, trade meetings, exhibitions and shopping festivals. Recently, we successfully hosted a world record tea party with the aim of bringing world-wide distinction to the city of Indore. With 32,618 people attending the tea-party, it doubled the previous record of 14,918, setting a new Guinness World Record. The event was sponsored by Hindustan Unilever Limited (Brooke Bond Red Label) and the Tea Board of India (a Government of India enterprise responsible for promoting the tea industry). This was a multi-media effort planned and executed over a three month period by *Dainik Bhaskar*. We foresee significant growth potential for this business and intend to continue to devote our efforts towards its expansion.

Our Sales and Circulation

We earn a portion of our revenues from selling our newspapers (circulation revenue including sale of power and wastage sales). For the financial year ended March 31, 2009 and the three months ended June 30, 2009, our circulation revenue including sale of power and wastage sales constituted 23.07% and 21.96%, respectively, of our unconsolidated total revenues. For the financial year ended March 31, 2009 and the three months ended June 30, 2009, the aggregate daily circulation of our newspapers was approximately 3.686 million and 3.493 million copies, respectively (Source: Certificate provided by M/s. Gupta Navin K. & Co., Chartered Accountants) . Detailed information on the circulation of each publication is given above in the section entitled “Our Business — Our Products and Services” beginning on page x.

We sell our newspapers and periodicals through the following channels:

- regular sales through trade;
- subscription sales through trade;
- direct subscriptions from customers;
- cash sales through stalls; and
- institutional sales (such as to airlines and hotels).

Pricing of Editions

The cover prices we charge for our newspapers depend on market conditions and competition. We offer different subscription and pricing schemes in different markets. Customers often pay prices below the cover price when purchasing by annual subscription. In India, regional and vernacular editions generally have much higher cover prices and a lower number of pages compared to English dailies.

For every newspaper sold, we receive the price paid by the customer net of commissions, which generally range from approximately 25.0% to 40.0%, and are withheld by our agents and vendors.

Distribution

Our distribution/circulation department is responsible for managing and monitoring our distribution activities by maintaining good relationships in the distribution chain. In major cities we generally organize our distribution network into separate regions, and each region into zones under which we have distribution centers. The vendors are controlled and organized by our agents, who operate from distribution centers. Individual vendors collect the newspapers from the distribution centers or agents and deliver them to households, offices and institutions. Having distribution centers allows for early morning distribution (between three a.m. and 7 a.m.). Changes in the number of newspapers sold are reported by vendors up the distribution chain. Our agents generally collect cash from the vendors upon delivery of the newspapers on a daily basis, although in smaller markets billing and collection occurs on a less frequent basis.

As of June 30, 2009, we had 74 distribution centers, 3,293 agents, 3,685 sub-agents, 18,805 vendors and 13,027 sub-vendors within our distribution network. Set out below is certain information in relation to our distribution network in some of our key markets:

Distribution centers are generally common to various newspapers being circulated in a particular area. In order to promote circulation, we organize various trade related activities (including incentive schemes) from time to time.

Our distribution/circulation department also works closely with our marketing department on various reader promotion activities, such as sampling of newspapers and co-coordinating reader promotion contests.

Our Advertising Revenue

Our advertisement revenue constitutes a substantial portion of our total revenue. For the financial year ended March 31, 2009 and the three months ended June 30, 2009, advertisement revenue constituted 74.85% and 75.67% of our unconsolidated total revenue, respectively. Advertising is done on a national, regional and local level. National campaigns generally focus on major cities.

Our advertisers can be broadly classified into local advertisers and national advertisers. Our local advertisers generally include retail and regional customers whereas our national advertisers include companies with large-scale operations in multiple cities or at a national level. In terms of advertisers from various industries, our top customers are usually from the automobile, education, banking and financial services, electronics and retail sectors, although we also have customers from other industries. Some of our top customers include Maruti Suzuki India Limited, LG Electronics India Pvt Ltd. and Samsung India Electronics Pvt Ltd.

For the financial year ended March 31, 2009 we derived 60.4% and 39.6% of our unconsolidated advertisement revenues from local and national advertisers, respectively, and for the three months ended June 30, 2009, we derived 61.9% and 38.1% of our unconsolidated advertisement revenues from local and national advertisers, respectively. We have strong relationships and rapport with the advertisers and advertising agencies.

Advertising

In order to maintain readership and the quality of our newspaper, we attempt to maintain a balance between advertisement and editorial content. In high advertisement periods (such as prior to Diwali), we have the flexibility to increase the size of our newspapers to include more advertisements, and we balance that with additional editorial content. Set forth below are broad categories of advertisements in our newspapers.

- **Display Advertisements** – These advertisements usually relate to product/corporate promotional campaigns and are largely utilized by customers in the education, automobile, financial services and real estate sectors. For the purposes of revenue segmentation, display advertisements are further divided into color display advertisements and black and white display advertisements.
- **Government** – These are advertisements for publicizing (i) schemes and achievements of various Government departments, (ii) contracts and (iii) tenders that various government and public sector enterprises publish for their procurements and sales. These are routed through the Directorate of Advertising and Visual Publicity (“DAVP”) in respect of the GOI and, with respect to most state governments, through the Directorate of Information and Public Relations (“DIPR”) and various designated authorities.
- **Classifieds and Notices** – These are classified advertisements published by individuals and companies in respect of marriages, obituaries, real estate, legal issues and situations vacant.

In addition to advertisements in the main section of the newspapers, we also have advertisements in various supplements which are targeted at different segments of readers and advertisers.

Advertising Sales

We sell advertisement space of our newspapers through advertising agencies as well as directly to the underlying customers. For the GOI, the sale of advertisement space is generally done through the DAVP. For state governments, the sale of advertisement space is generally done through the DIPR and various designated authorities. Individuals often place advertisements in our classified sections directly with us or through our booking centers.

We have established relationships with a number of leading advertising agencies in India. These agencies are divided into two categories, namely, accredited agencies with the Indian Newspaper Society (“INS”) and non-accredited agencies. As of June 2009, we had relationships with 1,549 accredited agencies and 2,715 non-accredited agencies (Source: Certificate provided by M/s. Gupta Navin K. & Co., Chartered Accountants) .

We generally enter into rate contracts with most of our large advertisers or advertising agencies on a campaign by campaign, volume or market share basis. In certain markets, local advertisers generally buy advertisement space directly from us. Generally, the basic document received by us for the publication of an advertisement in a newspaper is a release order form issued by the agency/client. The release order form contains all relevant information in relation to the advertisement including the size of the advertisement, placement, rate to be charged, date of publication, type and category of advertisement. The release order forms which we receive are processed by our information technology systems for the scheduling of the advertisement and the billing of the customer. Under the INS rules, we are required to provide two calendar months’ credit after the month in which the advertisement is published. If agencies accredited with INS default in their payment obligations to us, INS supports our credit collection efforts by placing them in the suspended/disaccredited category. Those agencies placed on the suspended/disaccredited category experience difficulties in placing advertisements. In addition, INS can use the security deposit paid by the agency at the time of its accreditation to help satisfy outstanding amounts owed to us, although such amounts may not be sufficient to cover the entire amount owed. In the case of the non-accredited advertisers, in order to minimize the risk of credit default, we generally require payment upon receipt of a release order form or require a security deposit to be placed with us for a specified period, during which time the relevant customer is able to place advertisements in our publications up to a maximum amount which is equal to the amount of the security deposit.

Advertising Rates

Our advertising rates are revised at regular intervals. Our rates are generally denominated in square centimeters. Our basic rates for advertising space are generally fixed. However, we charge premium rates for various upgrades based on, among other factors:

- the category of the advertisement, including display, government, tenders, obituaries, classifieds and supplements;
- the size and positioning of the advertisement (for example, front page or back page) in the newspaper and, in some cases, the positioning of the advertisement on the relevant page; and
- whether the advertisement is in color or black and white.

We also take into account the following:

- volume incentives may be allowed to certain agencies and customers, based on the assured commitment of volume of business;
- special rates may be considered for clients who agree to publish in all editions;
- special rates may be considered for certain upcountry (rural) advertisers;
- special rates may be considered in the case of full page releases; and
- As per INS rules, our advertisement rates are inclusive of a 15% advertising agency commission.

Advertising Customers

Our advertising customers include companies, government and quasi-government departments and the underlying customers. For the financial year ended March 31, 2009 and the three months ended June 30, 2009, we derived 75.50% and 76.35%, respectively of our consolidated total income from advertisement income. Our largest customer contributed approximately 1.3% of our total unconsolidated advertising revenue for the financial year ended March 31, 2009 and 1.1% of our total unconsolidated advertising revenue for the three months ended June 30, 2009.

Media Marketing Department and Initiatives

As of June 30, 2009, we had 922 employees in our media marketing department. This department is responsible for generating ideas to market advertising space to our advertisers in ways which enable them to derive maximum benefit from advertising with us. Our media marketing department strives to develop new ideas and initiatives, including:

- developing products and features for specific industries; and
- preparing integrated multimedia packages which allow our advertisers the benefit of promoting their products through print, radio and digital media as well as ground activation.

Marketing

We actively market our brands and undertake a variety of programs to increase the readership of our newspapers. Our marketing department develops brand strategy, manages the brands and communicates our brand positioning to target readers. Its role also includes developing various reader involvement programs.

To enhance our brand image, we use a wide range of marketing tools, including advertising, public relations and consumer involvement promotions. From time to time, our marketing department uses various media vehicles to strategically promote our brands. The department also tracks the health of our brands through regular surveys.

Market Research

Our management team has devoted substantial effort and attention to the development of a methodology for the identification of new opportunities for geographic and brand extension. We analyze the size of each potential market according to metrics such as the percentage of the population who read newspapers compared to the percentage of the population who can read. We then compare these metrics against demographically similar, but more established, markets in order to identify potential new market opportunities. Launching in new markets is risky and logistically complex. It requires coordination of substantial manpower resources in order to solicit consumer input and develop consumer relationships on a large scale. To solicit consumer input, we appoint surveyors to make direct contact with households and conduct area and population mapping. These surveyors are centrally trained and employ standardized contact methods in order to highlight the inadequacy of existing journals to consumers and stimulate their desire for new journals tailored to meet their needs and interests. Our survey process is conducted in an expedited manner so that we are able to survey a substantial number of households in a short period of time. Survey results are then channeled back to management, helping us to create newspapers that respond to the needs of the population – a newspaper that is “by the people, for the people and of the people”. The added benefit of this process is that a contact and demographic log of all surveyed households is created in the process, indicating consumer preferences.

Our Infrastructure

Printing Infrastructure

We print our newspapers at 30 facilities spread across 30 cities, with a total installed capacity of approximately 1.94 million copies per hour. In addition to printing our own publications, we also carry

out printing jobs for third parties.

We own all the press, pre-press and post-press facilities and related equipment at these facilities, although all of the centers are located in leased premises. We believe that our facilities provide us with the following benefits:

- the ability to offer high page levels and printing speed;
- high quality of printing and folding paper; and
- the ability to offer color pages.

The Newspaper Publication Process

The workflow for publishing each of our newspapers involves the following steps:

- *News Gathering:* News from various agencies such as Associated Press (AP), Associated Foreign Press (AFP), and Reuters, and from our network of reporters, correspondents and writers arrives in a central news server, which automatically distributes them to the respective editing desks.
- *Advertisement Procurement:* The advertisement team books the advertisements procured from agencies/clients in a central system using SAP IS-MEDIA software and uploads the advertisement created in the system for specific edition, page numbering and specification of date of publication.
- *Page Making:* A typical page consists of inputs such as advertisements, new items, photographs, graphics and fixed elements like page folios, templates and layout style-sheets. The Integrated Editorial Management System (“IEMS”) collects the scheduled advertisements from SAP and places them on the relevant pages. IEMS also collects the news pictures and graphics allocated to each page and displays them in a page inbox. The page editor then places each item according to a suitable layout.
- *Page Transmission:* The finished pages are automatically converted into PDF format by the IEMS and are then transmitted to the plate-making department.
- *Plate-Making* The image of the pages is imprinted on a metallic plate using Computer-to-Plate technology. The metallic plates are then punched and bent for mounting on the press cylinder for printing.
- *Printing:* The newspaper is then printed on high speed web offset printing machines with multiple printing units being used simultaneously depending on the colors and number of pages in each copy.
- *Packing:* The printed newspapers are counted and stacked in bundles. These are further wrapped and strapped for loading onto lorries. This operation is carried out by mailroom equipment.
- *Delivery:* The bundles received from the packing lines are then loaded onto designated lorries and dispatched to their respective destinations.
- *Distribution:* The newspapers arrive at common sales points which are located at several locations in each city. The hawkers buy the newspapers from the sales agents and distribute them to the subscribers.

Our Sources of Newsprint

Newsprint is the paper on which we print our newspapers. Newsprint is the most significant cost to our business. For the financial year ended March 31, 2009 and the three months ended June 30, 2009, newsprint costs totaled Rs. 4,074.40 million and Rs. 820.34 million, or 43.70% and 32.34% of our

unconsolidated total revenues and 52.87% and 51.69% of our unconsolidated total costs (excluding financial expenses and depreciation / amortisation), respectively.

Newsprint demand has been sensitive to economic cycles, and it is not uncommon to observe differences between demand and supply levels. Additionally, the short-term volatility in the newsprint price has a significant bearing on the financial performance of the worldwide newsprint industry, thereby resulting in alternating periods of financial gains and losses. For further details, please refer to the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations" beginning on page 249.

Pricing

Although spot purchases of newsprint are generally available, quantities are preferably agreed through medium term contracts which generally have terms of approximately three to four months. Different newsprint prices prevail in markets like Europe and Canada due to a variety of factors, including demand and supply and freight rates.

Prices of newsprint in India are also volatile. Generally, in periods of low pricing, Indian newsprint prices are relatively lower than international prices as newsprint producers generally prefer to ship their surplus stock to countries such as India to maintain pricing in their home markets and avoid situations of over-supply. Likewise, in a high-pricing scenario, prices in India generally firm up faster than international prices due to the relatively low bargaining power of Indian newsprint consumers and the preference of the international manufacturers to first meet the demand of their larger customers in other countries.

The Company enters into hedging transactions when the need arises in order to protect itself from foreign exchange fluctuation risks, particularly in relation to the import of raw materials. However, at present, the Company is not party to any hedging arrangements. For further details, please refer to the section titled "Risk Factors – Risks relating to our Company and its Business - Exchange rate fluctuations may adversely affect our financial performance" beginning on page x.

Sourcing Newsprint

Our materials division handles the procurement of newsprint. The division monitors international price movements in newsprint costs and closely interacts with the main suppliers and endeavors to extract the best terms and prices.

We enter into pricing arrangements with certain suppliers on a short to medium-term basis and vary procurement quantities between suppliers within the overall sourcing framework. These suppliers include:

- *Indian Suppliers.* Indian suppliers generally produce a limited range of quality newsprint. Our key Indian suppliers include Rama Newsprint & Papers Ltd., Nepa Ltd., Malu Paper Mills Ltd., Shah Paper Mills Ltd. and N.R. Agarwal Industries Limited. For the year ended March 31, 2009, we sourced approximately 76.9% of our annual newsprint requirements from these producers.
- *International Producers.* We also source newsprint from international producers, such as Norske Skog Pan Asia Co. Pte Ltd. in Singapore, Central National Gottesman Asia Ltd. in China, Jacob Jurgensen Paper and Zellstoff GMBH from Germany and Mayar (H.K. Ltd.) in Hong Kong, according to our needs to take advantage of any price or quality differentials that may exist between the markets. For the year ended June 30, 2009, we sourced approximately 23.1% of our annual newsprint requirements from international manufacturers and suppliers.

Our Newsprint Sourcing Mix

Our newsprint sourcing strategy is based on optimizing the total newsprint cost by using different combinations of newsprint for different editions based on the overall importance of the editions from

the perspective of circulation and revenues.

Our Competition

The Indian newspaper industry is intensely competitive. In each of our major markets, we face competition from other newspapers for circulation, readership and advertising, which depend on the cover price, quality of editorial content and circulation of our newspapers. In addition, we face competition from other forms of media including, but not limited to, television, magazines, radio and internet websites. These other forms of media compete with newspapers for advertisers and also for the time and attention of our readers.

For more information on competition for our newspapers, please refer to the section titled “Our Business— Our Products and Services” and “Risk Factors – Risks Relating to Our Company and Its Business” beginning on pages 57 and x, respectively.

Newspaper Industry Regulations

Every person publishing, or intending to publish, a newspaper or a periodical, in India has to be registered under Press and Registration of Books Act, 1867 (“**PRB Act**”). The authority under the PRB Act is the office of the RNI, which performs the functions of issue of certificate of registration to newspapers, compilation and maintenance of a register of newspapers containing particulars about all the newspapers published in India and certain other specified functions. The chief objective of the RNI is to regulate the newspaper industry and ensure compliance with the provisions of the PRB Act.

Every person in possession of a press for printing is bound to make a declaration before the District Presidency or Sub-Divisional Magistrate within whose local jurisdiction the press is situated. A fresh declaration is required upon change of ownership of the press, as also when such printer / publisher is out of India for a period of ninety days. Each of the two originals of every declaration so made and subscribed has to be authenticated by the signature and official seal of the Magistrate before whom the said declaration shall have been made. Provided that where any declaration is made and subscribed, the declaration shall not, save in the case of newspapers owned by the same person, be so authenticated unless the Magistrate is, on inquiry from the Press Registrar, satisfied that the newspaper proposed to be published does not bear a title which is the same as, or similar to, that of any other newspaper published either in the same language or in the same State.

Registration of Newspapers

The Registration of Newspapers (Central) Rules, 1956 (“**Registration Rules**”) stipulate certain conditions in relation to the newspapers registered under PRB Act. The authority under the Registration Rules is the press registrar (“**Press Registrar**”) who seeks to ensure the governance of the working of the newspapers.

A publisher of newspapers is obliged to send one copy of every issue of newspaper, within 48 hours of its publication and also furnish annual statements to the Press Registrar relating to each financial year and should reach press registrar before last day of May of the following year. Further, the publisher of a newspaper is required to publish in every issue of his newspaper the retail-selling price of each copy and when there is no such selling price then it shall be published that it is for free. If there is a change in retail selling price of a newspaper, the publisher shall within 48 hours of such change send intimation to the Press Registrar. Every copy of a newspaper is also required to print legibly on it the names of the printer, publisher, owner and editor and the place of its printing and publication.

Newsprint Allocation Regulation

Newsprint is an important raw material for printing of the newspaper. The newsprint allocation is regulated by the Newsprint Control Order, 1962 and the Newsprint Import Policy is announced by the

Government every year. Since 1994-95, the newspapers are issued entitlement certificates for import and purchase from the scheduled indigenous newsprint suppliers.

The Newsprint Policy is modified every year depending upon the import policy of the Government. Newsprint has been placed under 'open general licence' with effect from May 1, 1995 whereby all types of newsprint have become eligible for import by actual users without any restriction. Under the latest newsprint policy/ guidelines for the import of newsprint issued by the MIB, authentication of certificate of registration is done by the RNI for import of newsprint, on submission of a formal application and necessary documentary evidence.

Import of Newsprint

RNI is the sponsoring authority for the import of newsprint at the concessional rate of custom duty available to the newspapers. As per the current policy any registered newspaper would be eligible to import newsprint. The publisher/owner of a newspaper is required to have a certificate of eligibility from the RNI on the basis of which such publisher/owner will be allowed to import newsprint.

Regulation of the Press

The Press Council Act, 1978 ("**Press Council Act**") establishes a press council ("**Press Council**") for the purpose of preserving the freedom of the press and of maintaining and improving the standards of newspapers and news agencies in India. Under the Press Council Act, the Press Council of India has been established with effect from March 1, 1979. The functions of the Press Council include prescribing a code of conduct for newspapers, news agencies and journalists, and concern itself with developments such as concentration of or other aspects of ownership of newspapers and news agencies that may affect the independence of the press. The Press Council Act and the Press Council Rules, 1979 empower the Press Council to warn, admonish or censure the newspaper, the news agency, the editor or the journalist or disapprove the conduct of the editor or the journalist if it finds that a newspaper or a news agency has offended against the standards of journalistic ethics or public taste or that an editor or a working journalist has committed any professional misconduct provided that the Press Council may not take cognizance of a complaint if in the opinion of the Chairman, there is no sufficient ground for holding an inquiry. The Press Council is not empowered to hold an inquiry into any matter in respect of which any proceeding is pending in a court of law. For holding an enquiry the Press Council has the power as vested in a civil court while trying a suit under the Code of Civil Procedure, 1908, in respect of the followings matters (a) summoning and enforcing the attendance of persons and examining them on oath (b) requiring the discovery and inspection of documents (c) receiving evidence on affidavits (d) requisitioning any public record or copies thereof from any court or office (e) issuing commissions for the examination of witnesses or documents. Every inquiry held by the Press Council shall be deemed to be a judicial proceeding within the meaning of sections 193 and 228 of the IPC.

one issue of the Indian publication does not exceed 20% of the total printed area, due credit is provided to the content provider as a by-line in the Indian publication and compliance to certain other conditions. These guidelines would not apply to the cases where MIB has issued its approval/no objection certificate for publication of Indian edition of a foreign magazine/journal/newspaper

The Working Journalists and Other Newspaper Employees (Conditions of Service) and Miscellaneous Provisions Act, 1955 regulates the conditions of service of working journalists, non-journalists newspaper and news-agency employees. In this regard, the Central Government is empowered to constitute a Wage Board who recommends wages for such working journalists, non-journalists newspaper and news-agency employees. Regulations Governing Radio Broadcasting

The Indian Telegraph Act, 1885

The Indian Telegraph Act, 1885, as amended by the Telegraph (Amendment) Act, 2003, (“**Telegraph Act**”) is the principal legislation governing radio broadcasting in India. Although the broadcasting industry was not specifically contemplated at the time the Telegraph Act was drafted, courts in India have held that the provisions of the Telegraph Act are also applicable to radio broadcasting. The Telegraph Act provides that the Central Government shall have the exclusive privilege of establishing and maintaining telegraphs and further empowers the Central Government to notify the rates at which messages may be transmitted to any country outside India. The Central Government may also grant licenses, on such conditions and in consideration of such payments as it thinks fit, to any person to establish, maintain or work a telegraph within any part of India.

The Indian Wireless Telegraphy Act, 1933

The Indian Wireless Telegraphy Act, 1933 ("**Wireless Act**") regulates the possession of the wireless telegraphy apparatus and regulates all forms of "wireless communication", which means any transmission, omission or reception of signs, signals, writing, images and sounds, or intelligence of any nature by means of electricity, magnetism, or utilize radio waves or Hertzian waves, without the use of wires or other continuous electrical conductors between the transmitting and the receiving apparatus. It stipulates that no person shall possess wireless telegraphy apparatus without obtaining a license in respect thereof under the Wireless Act. The Wireless Act further provides that the telegraphy authority constituted under the Telegraph Act shall be the authority competent to issue licenses to possess wireless telegraphy apparatus under the Wireless Act, and may issue licenses in such manner, on such conditions and subject to such payments, as may be prescribed.

Hence, applications under the Wireless Act are made to the Wireless Planning & Coordination Wing ("**WPC**"), a department of the Ministry of Communications, created in 1952. The WPC is the national radio regulatory authority responsible for frequency spectrum management, including licensing to wireless users (government and private) in India. It exercises the statutory functions of the Central Government and issues licenses to establish, maintain and operate wireless stations. The WPC is divided into major sections like licensing and receipt, new technology group and Standing Advisory Committee on Radio Frequency Allocation ("**SACFA**"). SACFA makes the recommendations on major frequency allocation issues and clearance from the SACFA is required prior to commencing FM broadcasts. It is also involved in formulation of the frequency allocation plan, making recommendations to the International Telecom Union and clearance of all wireless installations in the country.

The Telecom Regulatory Authority Act, 1997

Under the Telecom Regulatory Authority Act, 1997 ("**TRAI Act**"), the Telecom Regulatory Authority of India ("**TRAI**") is empowered to make recommendations to the Central Government or the entity empowered under the Telegraph Act to issue licenses in connection with matters such as the need and timing for introduction of new service providers, terms and conditions of licenses issued to service providers and the revocation of licenses for non-compliance with terms and conditions. The functions to be discharged by the TRAI include ensuring compliance with the terms and conditions of licenses, regulate revenue sharing arrangements among service providers and specifying the standards of quality of service to be provided by service providers. For the effective discharge of its functions, the TRAI is empowered to call upon any service provider at any time to furnish in writing such information or explanation as is required or to conduct an investigation into the affairs of any service provider or issue directions in respect thereof.

FM radio broadcasting services were brought within the ambit of the TRAI Act by means of Notification No. S.O. 444(E) dated January 9, 2004, whereby the Government notified broadcasting services as a part of telecommunication services under Section 2(i)(k) of the TRAI Act.

The Code for Commercial Broadcasting

The Code specifies general rules of conduct in advertising on radio and stipulates that any advertisement should conform to the laws of India and should not offend the morality, decency or religious susceptibilities of the population. Advertisement Revenue

We derive a significant portion of our total revenue from advertisement revenue. For the financial year ended March 31, 2009 and the three months ended June 30, 2009, advertisement revenue constituted 75.50% and 76.35%, respectively, of our consolidated total income.

We recognize our advertisement revenue as and when ads are published/displayed/aired and it is disclosed net of discounts. As per INS rules and industry practice, our advertisement rates are inclusive of a 15% commission which is payable to advertisement agents. For further details about how we price and collect our advertisement revenue, please refer to the section titled “Our Business – Our Advertising Revenue – Advertising Sales” beginning on page 57 of this Draft Red Herring Prospectus.

Our advertisement revenue is affected significantly by our readership and circulation as well as the competition that we face from other players in the media industry, all of which drive demand for advertising and the advertising rates which we can charge.

Sale of Newspapers, Magazines, Power and Waste

We also earn revenues from selling our newspapers, magazines (circulation), power and waste. For the financial year ended March 31, 2009 and the three months ended June 30, 2009, sales accounted for 22.46% and 21.35%, respectively, of our consolidated income, respectively.

We recognize revenue when our agents provide us with the net amount of newspapers and magazines sold, unsold newspapers and magazines are returned to us to be sold as scrap and accounted as other income. Our sale of publications revenue is net of sales returns and discounts. For further details about how we price and distribute our newspapers, please refer to the section titled “Our Business – Our Sales and Circulation” beginning on page 57.

Cost of Raw Materials

Newsprint is the major raw material in our business, and is the most significant cost to our business. For the financial year ended March 31, 2009, consolidated newsprint costs totaled Rs. 4,074.40 million or 42.40% of our consolidated total revenues and 50.07% of our consolidated total cost (excluding financial expenses and depreciation/amortization). For the three months ended June 30, 2009, consolidated newsprint costs totaled Rs. 820.34 million or 31.31% of our consolidated total revenues and 48.75% of our consolidated total costs (excluding financial expenses and depreciation/amortization).

We have medium-term contracts with Indian suppliers and international producers. Our Indian suppliers include Rama Newsprint & Papers Ltd, Nepa Ltd, Shree Rajeshwaranand Paper Mills Ltd., Shah Pulp & Paper Mills Ltd. and N.R. Agarwal Industries Limited. Among our international suppliers are Norske Skog Pan Asia Co. Pte Ltd. in Singapore, Central National Gottesman Asia Ltd. in China, Jacob Jurgensen Paper and Zellstoff GMBH from Germany and Mayar (H.K. Ltd.) in Hong Kong.

The price of newsprint, both worldwide and in India, has historically been both cyclical and volatile. During the industry cycle, the price of imported newsprint in India may vary from international prices. In addition, we do not hedge the price of our newsprint purchases (except for our foreign exchange exposure, which we hedge selectively). Fluctuations in the price of newsprint in any given period will affect our results of operations during that period. For further details on the price of newsprint, please refer to the section titled “Our Business-Our Sources of Newsprint” beginning on page 57.

New Editions

The newspaper industry has extremely high costs of entry into new markets. New editions of newspapers usually make losses for the first two to four years of publication due to heavily subsidized cover prices and high marketing costs. Over time, new editions mature and eventually achieve the profitability levels which they are expected to achieve in the longer term.

Foreign Currency

Our foreign currency exposure primarily relates to our import of newsprint, which is priced in US dollars, and to our capital expenditures for printing presses and other machines, which if imported are generally priced in foreign currencies, in particular US dollars and Euros.

Foreign currency transactions are recorded in Rupees by applying the foreign currency amount, the exchange rate between the Indian Rupee and the foreign currency prevailing at the date of the transaction. Foreign currency monetary items are reported using the closing rate.

Foreign currency exchange differences arising on the settlement of monetary and non-monetary items at rates different from those at which they were initially recorded during the year or reported in previous financial statements are recognized as income or expense in the year in which they arise.

Adverse movements in foreign exchange rates (e.g. depreciation of the Rupee), to the extent unhedged, may adversely affect our business, results of operations and financial condition.

Macroeconomic factors in India

As our businesses are based in India, macroeconomic factors including the growth of the Indian economy, interest rates inflation and the political and economic environment, have a significant impact on our business, results of operations and financial condition.

SIGNIFICANT ACCOUNTING POLICIES

Significant accounting policies are those that are both (i) relevant to the presentation of the Company's financial condition and results of operations and (ii) require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. As the number of variables and assumptions affecting the possible future resolution of the uncertainties increase, those judgments become even more subjective and complex. In order to provide an understanding of how the Company's management forms its judgments about future events, including the variables and assumptions underlying its estimates, and the sensitivity of those judgments to different circumstances, the Company has identified the significant accounting policies discussed below. While the Company believes that all aspects of its financial statements should be studied and understood in assessing its current and expected financial condition and results of operations, it believes that the following significant accounting policies warrant particular attention. For further details, please refer to the section titled "Financial Information" beginning on page F1.

Use of Estimates. The preparation of financial statements in conformity with Indian GAAP requires management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and disclosure of contingent liabilities on the date of financial statements. The recognition, measurement, classification or disclosure of an item or information in the financial statements has been made relying on these estimates to a greater extent.

Revenue Recognition. Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Specifically, the following basis is adopted.

- **Advertisements.** Revenue is recognized as and when advertisement is published /displayed / aired and is disclosed net of discounts.

- *Sale of Publications, Waste Paper and Scrap.* We recognize revenue when our agents provide us with the net amount of newspapers and magazines sold, unsold newspapers and magazines are returned to us to be sold as scrap and accounted as other income.
- *Printing Job Work.* Revenue from printing job work is recognized on the completion of job work as per terms of the agreement.
- *Interest.* Revenue is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

Depreciation/Amortization/Impairment of Assets. Depreciation is provided on Straight Line Method at the rates computed based on estimated useful life of the assets, which are equal to the corresponding rates prescribed in Schedule XIV to the Companies Act, 1956.

We assess at each balance sheet date whether there is any indication that any asset (including goodwill) may be impaired. If any such indication exists, the carrying value of such asset is reduced to its recoverable amount and the amount of such impairment loss is charged to the profit and loss account. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, then such loss is reversed and the asset is restated to that effect.

Assets costing below Rs. 5,000 are fully depreciated in the year of acquisition.

Intangibles are amortized as follows:

- *Goodwill.* Goodwill is amortized on a straight-line basis over 5 years.
- *One time Entry Fees.* One time entry fees represent the amount paid for acquiring new license for new radio stations and is amortized over a period of ten years.
- *Computer Software.* Computer Software, being the cost of ERP Licenses and Installation, is also amortized over 5 years.

CHANGES IN ACCOUNTING POLICIES

Since our incorporation, there have been no changes in accounting policies in relation to the financial operations of our Company.

DISCUSSION ON AN UNCONSOLIDATED BASIS

Three months ended June 30, 2009 compared to three months ended June 30, 2008

Total Income

The Company's total income increased by Rs. 270.95 million, or 11.96%, to Rs. 2,536.55 million for the three months ended June 30, 2009 from Rs. 2,265.60 million for the three months ended June 30, 2008.

The increase in total income was primarily due to increases in sales and advertisement income. The increase in sales was primarily attributable to an increase in the cover prices of certain editions, an increase circulation numbers as well as due to the launch of new editions of *Dainik Bhaskar*, *DNA* and *Business Bhaskar*.

- The increase in advertisement income was primarily due to increases in our advertising rates both on a national and local level, an increase in the amount of advertisement space made available both due to the introduction of new editions of *Dainik Bhaskar*, *DNA* and *Business Bhaskar* and additional advertising space made available in existing publications.

Expenditure

The Company's expenditure decreased by Rs. 227.40 million, or 12.00%, to Rs. 1,667.11 million for the three months ended June 30, 2009 from Rs. 1,894.51 million for the three months ended June 30, 2008. The decrease was primarily due to a reduction in newsprint prices in both the domestic and international newsprint markets as well as reduction in raw materials consumed due to reduction in print orders and modifications in pagination. In addition further reductions were due to cost efficiency measures, undertaken by the management, with respect to personnel costs and operating costs.

Restated Profit before Tax

Restated profit before tax increased by Rs. 498.35 million, or 134.29%, to Rs. 869.44 million for the three months ended June 30, 2009 from Rs. 371.09 million for the three months ended June 30, 2008. The increase in restated profit before tax was primarily attributable to an increase in advertisement income arising from upward revisions in our advertising rates both on a national and local level, an increase in our local and national advertising clients, an increase in the amount of advertisement space made available due to the introduction of new editions. In addition, due to cost rationalization measures adopted, operating costs have also decreased along with newsprint rates despite reduced circulation numbers.

Restated Profit after Tax

Restated profit after tax increased by Rs. 321.12 million, or 135.76%, to Rs. 557.66 million for the three months ended June 30, 2009 from Rs. 236.54 million for the three months ended June 30, 2008. The increase in restated profit after tax was primarily attributable to an increase in circulation and advertisement income and a reduction in our expenditure as a proportion of our total income, from 83.62% for the three months ended June 30, 2008 to 65.72% for the three months ended June 30, 2009.

Year ended March 31, 2009 compared to year ended March 31, 2008

Total Income

The Company's total income increased by Rs. 818.43 million, or 9.62%, to Rs. 9,324.33 million for the year ended March 31, 2009 from Rs. 8,505.90 million for the year ended March 31, 2008.

The increase in total income was primarily due to increases in advertisement income and sales income.

The increase in advertisement income was primarily due to our establishment of 17 new editions as well as upward revisions in our advertising rates, both on a national and local level, and an increase in our local and national advertising clients. In addition, increased income from the sale of newspapers was due to an increase of applicable rates.

Expenditure

The Company's expenditure increased by Rs. 1,346.69 million, or 19.62%, to Rs. 8,211.14 million for the year ended March 31, 2009 from Rs. 6,864.45 million for the year ended March 31, 2008. The decrease in profit before tax was primarily attributable to an increase in costs for newsprint as well as increases in operating and personnel expenses related to the launching of our new editions.

The newspaper industry has extremely high costs of entry into new markets. New editions of newspapers usually make losses for the first two to four years of publication due to heavily subsidized cover prices and high marketing costs. As of March 31, 2009, we had 16 editions which had been in publication for less than four years and had not yet achieved the profitability levels which they are expected to achieve in the longer term. We incurred significant losses in the amount of Rs. 589 million in relation to these emerging newspaper editions. We expect these emerging editions to mature and become profitable over time. For the same period, our 31 mature editions made a restated profit before tax of Rs. 1702 million, resulting in an unconsolidated profit before tax for the year ended March 31, 2009 of Rs. 1,113.19 million.

The increase in advertisement income was primarily due to upward revisions in our advertising rates, both on a national and local level, an increase in our local and national advertising clients and an increase in the amount of advertisement space made available due to the introduction of new editions.

The increase in other income was primarily due to an increase in third party printing job charges and gains due to foreign exchange rate fluctuations charges and transaction gains resulting from appreciation of the Indian Rupee against the U.S. dollar with respect to certain raw material purchases, including newsprint. Printing job work income increased to Rs. 70.40 million for the year ended March 31, 2008 from Rs. 58.99 million for the year ended March 31, 2007

Expenditure

The Company's expenditure increased by Rs. 811.35 million, or 13.40 %, to Rs. 6,864.45 million for the year ended March 31, 2008 from Rs. 6,053.10 million for the year ended March 31, 2007. The increase in total income was primarily due to increases in advertisement income and other income.

The increase in advertisement income was primarily due to upward revisions in our advertising rates, both on a national and local level, an increase in our local and national advertising clients and an increase in the amount of advertisement space made available due to the introduction of new editions (the Sagar edition (launched in Madhya Pradesh in October 2006), the Amritsar and Jalandhar editions (launched in October 2006), the Ahmedabad edition (launched in August 2006) and *DNA Money* (launched in August 2006)).

The increase in other income was primarily due to an increase in third party printing job charges and gains due to foreign exchange rate fluctuations charges and transaction gains resulting from appreciation of the Indian Rupee against the U.S. dollar with respect to certain raw material purchases, including newsprint. In addition, advertisement income increased at a faster rate than increases in expenditures.

The newspaper industry has extremely high costs of entry into new markets. New editions of newspapers usually make losses for the first two to four years of publication due to heavily subsidized cover prices and high marketing costs. OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have any off-balance sheet arrangements.

QUANTITATIVE AND QUANTITATIVE DISCLOSURE OF MARKET RISK

The Company's principal financial instruments consist of its long-term debt, cash on hand and in the bank, short-term investments and receivables from and payables to affiliated companies. These are used to provide funding for the Company's business operations. The Company enters into hedging transactions as and when it sees the need to do so in order to shield itself from fluctuations in currency exchange rates when importing raw materials. The Company is not currently party to any hedging transactions or speculation with respect to financial instruments.

The Company believes that the principal risks arising from its financial instruments are liquidity risk, interest rate risk and foreign exchange risk.

Interest Rate Risk

The Company's exposure to interest rate risk relates primarily to its long-term debt. As of June 30, 2009, the Company has consolidated secured loans of Rs 4,713.18 millions, which bore interest at floating rates. Therefore, fluctuations in interest rates could have the effect of increasing the interest due on the Company's outstanding debt and increases in such rates could make it more difficult for the Company to procure new debt on attractive terms. The Company currently does not, and has no plans to engage in, interest rate derivative or swap activity.

Liquidity Risk

The Company faces the risk that it will not have sufficient cash flows to meet its operating requirements and its financing obligations when they come due. The Company manages its liquidity profile through the efficient management of existing funds and effective forward planning for future funding requirements.

Going forward, and to the extent it is able to do so, the Company intends to primarily use internally generated funds and proceeds from this equity offering to meet its financing requirements.

Foreign Exchange Risk

As a media company, we are exposed to exchange rate risk. Newsprint, which is an essential to printing our papers, is generally priced in US dollars and some of our capital expenditures for printing presses and other machines are also priced in foreign currencies, in particular US dollars and Euros. As of March 31, 2009 22.5% of our newsprint was imported. In addition, our future capital expenditures, including any imported equipment and machinery, may be denominated in currencies other than Rupees. We currently have borrowings in Rupees as well as other foreign currencies and we may also, in the future incur borrowings in U.S. dollars or other foreign currencies. In such circumstances, declines in the value of the Rupee against U.S. dollar or other foreign currencies would increase the Rupee cost of servicing and repaying those borrowings and their value in our balance sheet. The exchange rate between the Rupee and the U.S. dollar has changed substantially in recent years and may continue to fluctuate significantly in the future. Although we may in the future enter into hedging arrangements against currency exchange rate risks, there can be no assurance that these arrangements will successfully protect us from losses due to fluctuations in currency exchange rates. Adverse movements in foreign exchange rates may adversely affect our results of operations and financial condition.

TAXES

For details regarding taxation and the regulatory environment in which our Company operates, please refer to the sections titled “Statement of Possible Tax Benefits available to the Company and its Shareholders” and “Regulations and Policies in India” on pages 38 and 82, respectively.

RECENT AND PROSPECTIVE CHANGES IN ACCOUNTING POLICIES

Since our incorporation, there have been no changes in accounting policies in relation to the financial operations of our Company. Going forward, there currently are no plans to make any changes in accounting policies in relation to the financial operations of our Company.

Procedure and Time of Schedule for Allotment and demat Credit of Equity Shares

The Issue will be conducted through a “100% Book Building Process” pursuant to which the members of the Syndicate will accept Bids for the Equity Shares during the Bidding/Issue period. The Bidding/Issue period will commence on [●], 2009 and expire on [●], 2009. Following the expiration of the Bidding/Issue period, our Company and the Selling Shareholder in consultation with the BRLMs, will determine the Issue Price. Our Company in consultation with the BRLMs will determine the basis of allocation and entitlement to Allotment based on the Bids received and subject to confirmation by the Designated Stock Exchange. Successful bidders will be provided with a confirmation of their allocation (subject to a revised confirmation of allocation) and will be required to pay any unpaid amount for the Equity Shares within a prescribed time. The SEBI Guidelines require our Company to complete the Allotment to successful bidders within 15 calendar days of the expiration of the Bidding/Issue period. The Equity Shares will then be credited and Allotted to the investors’ demat accounts maintained with the relevant Depository Participant. Upon approval by the Stock Exchanges, the Equity Shares will be listed and trading will commence.

Method of proportionate Basis of Allotment

In the event the Issue is oversubscribed, the Allotment shall be as per the basis of allocation approved by the Designated Stock Exchange. The executive director or managing director of the Designated Stock Exchange along with the BRLMs and the Registrar to the Issue shall be responsible for ensuring that the basis of Allotment is finalised in a fair and proper manner. Allotment to Bidders shall be made in marketable lots on a proportionate basis as explained below:

- (a) Bidders will be categorised according to the number of Equity Shares applied for by them.
- (b) The total number of Equity Shares to be Allotted to each category as a whole shall be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the oversubscription ratio.

- (c) The number of Equity Shares to be allotted to the successful Bidders will be arrived at on a proportionate basis, which is the total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the oversubscription ratio.
- (d) If the proportionate Allotment to a Bidder is a number that is more than [●] but is not a multiple of one (which is the market lot), the decimal will be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5, it will be rounded off to the lower whole number. Allotment to all Bidders in such categories shall be arrived at after such rounding off.
- (e) In all Bids where the proportionate Allotment is less than [●] Equity Shares per Bidder, the Allotment shall be made as follows:
- Each successful Bidder shall be Allotted a minimum of [●] Equity Shares; and
 - The successful Bidders out of the total Bidders for a portion shall be determined by the drawing of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (c) above; and
- (f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that portion, the remaining Equity Shares available for Allotment shall be first adjusted against any other category, where the Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. The balance of Equity Shares, if any, remaining after such adjustment will be added to the category comprising Bidders applying for the minimum number of Equity Shares.

For QIBs other than Mutual Funds (A1 to A5) = Number of Equity Shares Bid for \times 114/494

For Mutual Funds (MF1 to MF5) = (No. of shares bid for (i.e., in column II of the table above) less Equity Shares Allotted (i.e., column III of the table above) \times 114/494

The numerator and denominator for arriving at the allocation of 114 million Equity Shares to the 10 QIBs are reduced by 6 million shares, which have already been Allotted to Mutual Funds in the manner specified in column III of the table above.

Our Company, its Directors and officers, the Selling Shareholder, its directors, affiliates, associates and their respective directors and officers and the BRLMs are not liable for any amendments,
